For Customer Use:

Enter below the Model No. and Serial No. which are located on the rear of the cabinet. Retain this information for future reference.

Model No. _____

Serial No. _____

SAFETY PRECAUTIONS

The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

CAUTION:

To prevent electric shock do not use this (polarized) plug with an extension cord, receptacle or other outlet unless the blades can be fully inserted to prevent blade exposure.

IMPORTANT SAFEGUARDS

CAUTION: Please read and retain for your safety.

Electrical energy can perform many useful functions. This TV set has been engineered and manufactured to assure your personal safety. But improper use can result in potential electrical shock or fire hazards. In order not to defeat the safeguards incorporated in this TV set, observe the following basic rules for its installation, use and servicing. Also follow all warnings and instructions marked on your TV set.

INSTALLATION

1 Your TV set is equipped with a polarized AC line plug (one blade of the plug is wider than the other).

(POLARIZED-TYPE)

This safety feature allows the plug to fit into the power outlet only one way. Should you be unable to insert the plug fully into the outlet, try reversing the plug. If the plug still will not fit, contact your electrician. Should it still fail to fit, contact your electrician.

6 If an outside antenna is connected to the TV set, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection requirements for the grounding electrode.

7 An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, where it can fall into such power lines or circuits. When installing an antenna system, extreme care should be taken to keep away from such power lines or circuits as contact with them might be fatal.

EXAMPLE OF ANTENNA GROUNDING AS PER NATIONAL ELECTRICAL CODE

8 TV sets are provided with ventilation openings in the cabinet to allow heat generated during operation to be released. Therefore:

- Never block the bottom ventilation slots of a TV set by placing it on a bed, sofa, rug, etc.
- Never place a TV set in a "built-in" enclosure unless proper ventilation is provided.
- Never cover the openings with a cloth or other material.
- Never place the TV set near or over a radiator or heat register.

9 To avoid personal injury:

- Do not place a TV set on a sloping shelf unless properly secured.
- Use only a cart or stand recommended by the TV set manufacturer.
- Do not try to roll a cart with small casters across thresholds or over pile carpets.
- Wall shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

USE

10 Caution children about dropping or pushing objects into the TV set through cabinet openings. Some internal parts carry hazardous voltages and contact can result in a fire or electrical shock.

11 Unplug the TV set from the wall outlet before cleaning. Use a slightly damp (not wet) cloth. Do not use liquid or an aerosol cleaner.

12 Never add accessories to a TV set that has not been designed for this purpose. Such additions may result in a hazard.

13 For added protection of the TV set during a lightning storm or when the TV set is to be left unattended for an extended period of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to product due to lightning storms or power line surges.

14 TV set and cart combination should be moved with care. Quick stops, excessive turning, and uneven surfaces may cause the TV set and cart combination to overturn.

SERVICE

15 Unplug this TV set from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power cord or plug is damaged or frayed.
- If liquid has been spilled into the TV set.
- If the TV set has been exposed to rain or water.
- If the TV set does not operate normally by following the operating instructions. Adjust only those controls that are covered in the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the TV set to normal operation.
- If the TV set has been dropped or damaged in any way.
- If the TV set exhibits a distinct change in performance — this indicates a need for service.

16 Do not attempt to service this TV set yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

17 When replacement parts are required, have the service technician verify in writing that the replacement parts he uses have the same safety characteristics as the original parts. Use of manufacturer's specified replacement parts can prevent fire, shock, or other hazards.

18 Upon completion of any service or repairs to this TV set, please ask the service technician to perform the safety check described in the manufacturer's service literature.

19 When a TV set reaches the end of its useful life, improper disposal could result in a picture tube implosion. Ask a qualified service technician to dispose of the TV set.

20 Note to CATV system installer.

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Locations of Remote control buttons

Note:
• The remote controller illustrations in this manual show the AV-27BP5/31BP5/35BP5 remote controller.
The AV-31BM5 remote controller has the same layout and functions, but has no PIP buttons.

Locations of TV buttons and parts

FRONT PANEL

AV-27BP5/AV-31BP5/AV-31BM5

AV-35BP5

How to use the MENU (▼) button:

- Press this button to display a list of functions. While the list is being displayed, press the button again to select the desired function; then change the level or setting with OPERATE (◀)/CHANNEL (←) buttons.
- Other buttons may be used by referring to the respective page of this user manual.
- On the front panel, the MENU button and the EXIT button are not provided. To select the functions on the menu, use the MENU button. To release the TV from the MENU mode, use the VOLUME button.
- With the MENU operation on the front panel, you cannot set LOCK CODE, CHILD TIMER and the channel guard.
- When you activate the MENU mode on the front panel, the FRONT PANEL CONTROL menu will be displayed on the first page of the menus. The other menus after the first page are the same as those displayed on the operating remote controller. (Refer to page 14.)

Note:

- The front panel and rear panel illustrations in this manual show the AV-27BP5 and AV-35BP5 panels. Other models have the same button and terminal layout as the AV-27BP5, but the AV-31BM5 rear panel has no PIP/MAIN AUDIO OUT jack.

REAR PANEL

1 Antenna terminal	p.7
2 AV COMPU LINK jacks	p.32
3 INPUT (1, 2) jacks	p.30
4 LINE OUT jacks	p.30
5 AUDIO OUT (VARIABLE) jacks	p.30
6 PIP/MAIN AUDIO OUT jack (except AV-31BM5)	p.30
7 EXT SPKR switch	p.31
8 EXT SPKR jacks	p.30

Notes (also refer to "CONNECTION" on pages 30 to 35):

- AUDIO OUT (VARIABLE) jacks:** Outputs the sound of the picture appearing on the TV. The output sound level can be adjusted with VOLUME (←) on the TV.
- LINE OUT jacks:** Outputs the sound and picture that are appearing on the TV.
 - A picture that is input to the S-VIDEO jack of INPUT jacks is not output through the LINE OUT jacks.
 - If both the INPUT and LINE OUT jacks are connected to the same VCR, the screen becomes distorted except during playback of VCR.
- INPUT jacks:**
 - Audio output from monaural equipment is connected to INPUT 2 jack. Audio output is connected to the MONO jack.
 - Connect nothing to S-VIDEO jack, when using the VIDEO jack of INPUT 1 jack.
- PIP/MAIN AUDIO OUT jacks:** Is used for connecting cordless headphones. The AV-31BM5 has no PIP/MAIN AUDIO OUT jack. This terminal outputs the sound of the picture that is appearing on the TV. The sound of the PIP picture is output when the PIP picture is appearing on the screen.
- Antenna terminal:** Refer to page 7.
- EXT SPKR jacks:** Refer to page 30.

1. Connecting Antenna and Power cord

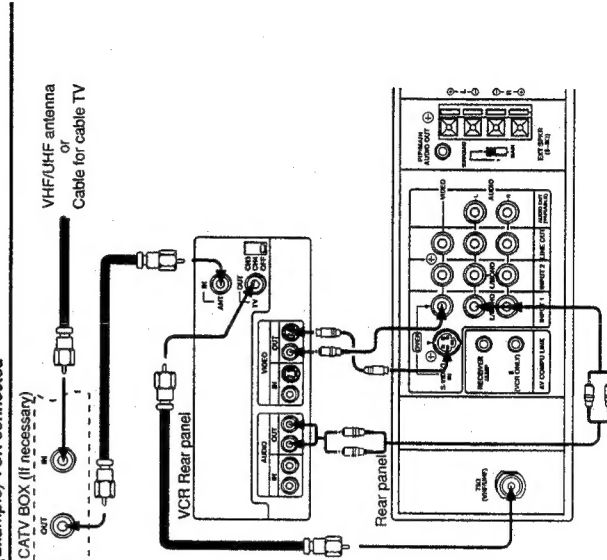

Conditions:

- Before connecting external devices, be sure to disconnect the TV from the AC outlet.
- When you want to view from a connected device such as a VCR, change the TV input mode with TV/VIDEO. Refer to step 2 on page 10.

(Example) No VCR connected

(Example) VCR connected

Notes:

- When connecting both a cable (75-ohm coaxial) and a VHF/UHF antenna (300-ohm lead-in), use an optional antenna mixer (CE41487) to make a single connection. With this antenna mixer, reception of cable channels higher than "Channel W-17" is not possible.
- The power cord is supplied with a polarized plug. Therefore, it will only insert one way into the wall outlet. DO NOT DEFEAT THE POLARIZED PLUG. If you have difficulty, consult your local dealer.
- Some cable companies require a converter box to receive all available programs. Others may require it for subscription or "premium" programming. Consult your local cable company for correct installation.

Notes:

- Refer to the manuals provided with the other devices.
- Interference from connected devices may cause the picture quality to deteriorate. If picture noise occurs, turn off devices that you are not using or move them further apart.
- Connect the video signal of S-VHS VCR to S-VIDEO jack.

2. Inserting Batteries into your Remote control

1 Raise up the latch on the cover to remove it.

Condition:
• Use two AA/RN03 batteries.

Caution:
• Follow the cautions printed on the batteries.

Notes:
• Battery life is approximately 6 months to 1 year depending on the frequency of use.
• In the remote control operation, the battery will be replaced automatically.
• Insert batteries correctly observing + and - polarities.
• If a manufacturer's VCR or CATV converter code has been set. The set manufacturer's code will be put in memory for the specific time. When you replace the batteries, do this within one minute. If the manufacturer's code is reset, set it again. (Refer to page 34.)

3 Replace the cover.

3. Turning the Power ON/OFF

Front panel

1 Press POWER.

The POWER/ON TIMER lamp lights up.

Condition:
• When controlling with the remote control, set the TV/CATV selector to TV.

• To turn off the TV, press POWER once again.
The POWER/ON TIMER lamp goes off.

4. Presetting the Channels

AUTO TUNER SETUP

You can set the channels which can be received. The preset channels can be selected with CHANNEL/HYPER SCAN (←+).

1. Press MENU ▽ or ▲ repeatedly to select AUTO TUNER SETUP, then press ◀ or ▶ to enter the setting menu. The AUTO TUNER SET UP menu is displayed.

2. Press MENU ▽ or ▲ to move the cursor to AUTO (STD, HRC, IRC) or AUTO (OTHERS), then press ◀ or ▶ to select it. The setting starts automatically.

• This completes the setting. PROGRAMMING OVER is displayed and the setting is complete.

AUTO (STD, HRC, IRC):
Almost all the cable companies use one of the following systems:
• Standard
• Harmonically Related Carrier.
• Incrementally Related Carrier.

AUTO (OTHERS):
For other than the above.

Notes:
• If you experience a problem, call your cable company. If they use a different system (not STD, HRC, IRC), repeat Step 1 and in Step 2 select AUTO (OTHERS).
• For details on the menu functions, refer to page 14.

• If you press CHANNEL/HYPER SCAN (←+), you can confirm the set channels.
• To add a channel to those set with the AUTO TUNER SETUP or to delete one of those channels, refer to "To set a channel for scanning" on page 22.

5. Self-demonstration mode

AUTO DEMO

You can view demonstration pictures for many of this TV's functions and operations. Viewing this self-demonstration mode before operating the functions makes this TV's functions and operations easier to understand.

1. Press MENU ▽ or ▲ repeatedly to select AUTO DEMO, then press the ◀ or ▶ key. The demonstration starts.

• To stop the demonstration, press any button.

Note:
• This demonstration mode is repeated in a cycle of about six minutes.

BASIC OPERATING PROCEDURE

Watching a Television Program

—TV/VIDEO, TUNER MODE

Front panel

1 Press POWER.

The POWER/ON TIMER lamp lights up.

2 If video mode (VIDEO-1, 2) has been selected, press TV/VIDEO repeatedly to switch it to AIR (or CABLE).

3 If necessary, press MENU \blacktriangledown or \blacktriangle repeatedly to select the TUNER MODE, then press \blacktriangleleft or \blacktriangleright to select the AIR or CABLE.

AIR \leftrightarrow CABLE

AIR:
To view TV broadcast
CABLE will be displayed if you have
turned off TV after watching cable TV
broadcast.

VIDEO-1, 2:
To view the video being input to an
INPUT 1, 2 jack. (Refer to page 30.)

AIR:
To view TV over the air broadcast.
CABLE:
To view CABLE stations.

Channel display:
For AIR, the channel number is
displayed in light blue and for CABLE,
the channel number is displayed in
yellow.

Note:
• The TUNER MODE (AIR or CABLE)
will be automatically set by executing
the AUTO TUNER SETUP.

BASIC OPERATING PROCEDURE

Watching a Television Program

—CHANNEL

4 Select a channel.

Scan selection

1. Press CHANNEL (-/+).
- + : to scan UP a channel number.
- : to scan DOWN a channel number.

Direct selection

1. Press a number key.
- Example: To select channel 5 (single-digit channel), press 0 and 5.
- Example: To select channel 35 (two-digit channel), press 3 and 5.
- Example: To select channel 115 (three-digit channel), press 100+, 1 and 5.

5 Press VOLUME (-/+).

The level indicator appears.

- + : The bars move right and the volume increases.
- : The bars move left and the volume decreases.

6 Press POWER to turn the power off.

The POWER/ON TIMER lamp goes off.

Note:
• The POWER/ON TIMER lamp glows
faint without turning off, while the
DUAL ON TIMER or HOME STAY is
in operation. (Refer to page 25.)

CHANNEL/HYPERSCAN (-/+) BUTTON:
The CHANNEL/HYPERSCAN (-/+) button
is a two stage button.
The functions change when you press this
button.

NORMAL SCAN UP/DOWN:
Each time you press the button lightly (1st
stage), the preset stations will be selected
one at a time.

HYPER SCAN UP/DOWN:
When pressing the button strongly (2nd
stage), the stations can be rapidly selected.
Only the channel numbers will be scanned,
and a station will be selected at the point
where you release the button.

Notes:

- Only preset channels can be selected
with scan selection. (Refer to page 6.)
- NORMAL SCAN UP/DOWN is carried
out through operation on the front
panel.

Note:

- See also the CABLE TV CHANNEL
CONVERSION CHART. (Refer to page
38.)

Note:

- This operation can also be done with
VOLUME (-/+) on the front panel.

Two-picture Screen

(The AV-31BM5 does not have this function) —PIP

Two screens (one large and one small) can be displayed at the same time. While viewing a playback picture from the VCR, you can also enjoy the TV broadcast.

Conditions:

- Connect the playback device (VCR, etc). (Refer to page 30.)
- You can only listen to the sound of the PIP picture by using cordless headphones (not supplied). (Refer to page 30.)

PIP:
Picture In Picture

Note:

- Both the main screen and the PIP picture must be in the same broadcast mode (AIR or CABLE).

To display the PIP picture

—ON/OFF button

1. Press ON/OFF.

The PIP picture appears.

2. To remove the PIP picture, press ON/OFF again.

The PIP picture disappears.

To change the position of the PIP picture —POSITION button

1. Each time you press POSITION, the PIP picture changes position.

To swap between the MAIN picture and the PIP picture

—SWAP button

1. Press SWAP.

The MAIN picture and PIP picture swap their places.

To switch the PIP picture input

—SOURCE button

1. Press SOURCE repeatedly to select the desired input.

→TV mode → VIDEO-1 → VIDEO-2

TV mode:
To view TV broadcast or cable TV broadcast. Channel number is displayed on the screen.

VIDEO 1, 2:

To view the video being input to an INPUT 1, 2 jacks. V-1, V-2 is displayed on the screen.

To still PIP picture

—FREEZE button

1. Press FREEZE.

The PIP picture pauses.

Note:

- If FREEZE is pressed while there is no PIP picture, the PIP picture will appear and then pause.
- If the PIP picture is paused, pressing SWAP, SOURCE, or SIZE unfreezes it.

2. Pressing FREEZE once again restores the regular picture.

To change the size of PIP picture

—SIZE button

1. Press SIZE.

The size of PIP picture changes.

MENU selection

—MENU, HELP, EXIT

Most of the television functions can be operated with the remote controller. When operating from menus, you can view screens explaining each function.

1. Press **MENU** \blacktriangledown or \blacktriangle .
A list of functions is displayed.

Note:
• From here on, "MENU" will be omitted from the \blacktriangle \blacktriangledown \blacktriangleleft \blacktriangleright button names.

2. Press \blacktriangledown or \blacktriangle repeatedly to select the function you want.
The function you have selected is displayed in yellow.

3. Press \blacktriangleleft or \blacktriangleright to enter the setting screen.
The setting screen of the selected function will be displayed.

Note:
• To stop the operation midway, press the EXIT button

4. Following the instructions in the on-screen message, use \blacktriangledown and \blacktriangle to move the cursor and \blacktriangleleft or \blacktriangleright to make settings.

- When you have completed your settings, press the EXIT button to leave the menu screen.

Viewing explanations of functions

—HELP

1. Press the **HELP** button during menu operations.

The screen shows an explanation of the currently selected function or of operations.

2. To return to the original screen, press the **HELP** button again.

Note:
• If a function is displayed in yellow, the screen explains it. During setting operations, the screen explains the operation.

Matching the TV to the current room state

—THEATER/AV STATUS

You can select the picture ideal for the program you are watching and the condition of the room you are watching in.

1. Press THEATER/AV STATUS repeatedly to select the mode you want.

THEATER → BRIGHT ROOM → CHOICE → RESET

- The picture changes to the selected mode.
The on-screen display disappears by itself after a few seconds.

THEATER:

- The picture can have softness and depth. Darken the room when viewing program to get the best effect.

BRIGHT ROOM:

- It is suitable for watching programs in a bright room.

CHOICE:

- Refer to page 19.

RESET:

- The sliding scales of TINT, COLOR, PICTURE, BRIGHT, and DETAIL are set at the center.

Adjusting the picture

—TINT, COLOR, PICTURE, BRIGHT, DETAIL, VNR, NOTCH

You can get the ideal picture according to the program and the room brightness. You may need adjust the picture to suit the current conditions.

1. Press the MENU buttons to display the picture adjustment screen.

2. Press ▼ or ▲ to select the item to set, then press ◀ or ▶ to set its level (or switch it ON/OFF).

- This completes the setting.
To leave the menu, press the EXIT button.

Note:

- There are two pages for picture adjustment.
- For NOISE MUTE, refer to page 27 and for SET AV STATUS page 19.

Note:

- For details on menu operations, refer to page 14.

Resetting picture/sound adjustments to factory settings:

Press THEATER/AV STATUS repeatedly to select RESET.

VNR (AV-35BP5 only)

Video Noise Reduction

ON: Set to this when the picture has noise.

OFF: Set to this for normal picture.

NOTCH:

ON: When a dotted pattern appears at the border line of colors, and when the lines appear ragged

OFF: While watching a normal screen.

Note:

- The selected item is displayed in yellow.

Adjusting the sound

—BASS, TREBLE, BALANCE

You can get the ideal sound according to the program.
You may need to adjust the sound to suit the current conditions.

1. Press the MENU buttons to display the sound adjustment screen.

2. Press ▼ or ▲ to select the item to set, then press ◀ or ▶ to set its level.

- This completes the setting.
To leave the menu, press the EXIT button.

Note:

- For MTS refer to "Listening to stereo and bilingual broadcasts" on this page.

Listening to stereo or bilingual broadcasts

—MTS

You can enjoy music and sports programs in stereo as well as listen to bilingual broadcasts in either language.

1. Press the MENU buttons to select MTS.

*"ON AIR" is displayed opposite the sound type in use for the current program.

2. Press ◀ or ▶ to select the mode you want (STEREO, SAP, MONO).

- This completes the setting.
To leave the menu, press the EXIT button.

MTS:

Multichannel Television Sound

Notes:

- MTS has no effect on normal sound broadcasts.
- MTS may not function normally while you are watching cable TV.

STEREO:

Stereo audio program

SAP:

Second Audio Program

MONO:

This option is selected when there is a lot of noise.

Muting the sound

—MUTE, MUTE LEVEL

You can mute the volume completely (to 0) or to a preset level. Muting is convenient when you answer the phone or when someone suddenly visits.

- Pressing it again restores the regular volume.

To preset the mute level

- 1. Press the MENU buttons to select MUTE LEVEL.**

2. Press ◀ or ▶ to set the mute level.
- This completes the setting.
To leave the menu, press the EXIT button.

Sound mode with a "being-there" feeling

LIVE EFFEX

You can enjoy the acoustic atmosphere of a theater or sports arena.

- Condition:**
- LIVE EFFEX only works on stereo sound.

- 1. Press LIVE EFFEX to alternate the ON/OFF status.**

- This completes the setting. The on-screen display disappears in a few seconds.

Notes :

- Muting pressing
- If the p lower th level, p to '0'.

- Muting can also be cancelled by pressing **VOLUME (-/+)**.
- If the program sound level is already lower than the preset mute level, pressing **MUTE** sets the sound to '0'.

MUTE LEVEL

- INITIAL SETUP
- ⊕ PREVIOUS 
- AUTO TUNER SETUP
- TUNER MODE CABLE AIR
- ⊕ MUTE LEVEL 6 III
- CLOSED CAPTION
- AUTO DEMO
- ⊕ NEXT PAGE
- SELECT BY  
- OPERATE BY    

- 2. Press ◀ or ▶ to set the mute level.**

- This completes the setting. To leave the menu, press the EXIT button.

You can memorize picture/sound adjustment settings. You can easily recall the settings, so that picture and sound settings can be switched over to enhance the program being watched.

- 1. Press the MENU buttons to select SET AV STATUS.**

The SET AV STATUS menu appears.

2. Press ▼ or ▲ to select the item to set, then press ◀ or ▶ to set its level (or switch it ON/OFF).

33. Press **▼** to move the cursor to **SAVE AS CHOICE**, then press **◀** or **▶** to select it.

- The setting is stored and the screen returns to the MENU screen. To leave the menu, press the EXIT button.

Note:

- Pressing **▼** while at **NOTCH** position displays the sound adjust menu.
- Pressing **▲** while at **BASS** position displays the picture adjust menu.

To recall the stored picture and sound settings.

- 1. Press THEATER/AV STATUS repeatedly to select CHOICE.**

THEATER → BRIGHT ROOM → CHOICE → RESET →

- The television changes to the stored settings. The on-screen display disappears by itself after a few seconds.

Learning Your Favorite Channels —YOUR FAVORITES

This TV automatically memorizes the channel being received. The received channels are stored cumulatively in units of 30 minutes. The 3 most frequently watched channels can be displayed, and the one you want can be selected from this list.

Condition:

- The built-in clock must be set. (Refer to page 24.)

1. Press the MENU buttons to select YOUR FAVORITES.

2. Press ▼ or ▲ to move the cursor to the channel you want, then press ◀ or ▶ to select it.

- The television changes to the channel you selected and the on-screen display disappears.

Channel selection according to Category

—CATEGORY PREVIEW

There are six categories and you can set six channels for each category.

Setting Procedure

1. If you need to, select the broadcast mode for the channels you will set (AIR or CABLE).

To select the broadcast mode:
Refer to page 10 "Watching a TV program", step 3.

2. Press the MENU buttons to select SET CATEGORY PREVIEW.

The six categories are displayed.

3. Press ▼ or ▲ to move the cursor to the category you want, then press ◀ or ▶ to select it.

The channel setting menu is displayed.

Notes:

- Two sets of your favorite channels are stored for each time period: DAYTIME or EVENING.
- DAYTIME: 4:00 am to 5:59 pm
- EVENING: 6:00 pm to 3:59 am
- If the clock is not working, this function is not activated.
- If there is a power interruption, stored channels are cancelled.

Notes:

- Each of the 3 channels are shown for a few seconds. The channel number (or station ID) of the channel shown will blink.
- The current time band (DAYTIME or EVENING) will be displayed in the brackets.
- If you select this function when no channels are not stored, "NOT ACTIVE" is displayed on the TV screen.

HANDY CHANNEL SELECTION YOUR FAVORITES CATEGORY PREVIEW RETURN

4. Press the MENU buttons to make the settings.

- Press ▼ or ▲ to select the position to set.
- Press ◀ or ▶ to select a channel.
- Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.

To continue setting other channels:

- To set in the same category:
Repeat 1 and 2 of Step 4.
- To set in a different category:
Repeat Steps 3 and 4.

Note:

- A channel which has been set in CHANNEL GUARD cannot be set. (Refer to page 23.)

When you select CANCEL:

All the channel settings for all the categories are cancelled.

To select a set channel

1. Press the CATEGORY PREVIEW.

The 6 category are displayed.

2. Press ▼ or ▲ to move the cursor to the category you want, then press ◀ or ▶ to select it.

A list of channels is displayed.

Note:

- Each set channel appears for a few seconds. The channel number (or station ID) of the channel shown will blink.

3. Press ▼ or ▲ to move the cursor to the channel you want, then press ◀ or ▶ to select it.

- The television changes to the channel you selected and the on-screen display disappears.

Returning to the previous channel —RETURN

You can return immediately to the channel you were watching before.

1. Press RETURN.

Channels alternate between the previous channel and original channel.

HANDY CHANNEL SELECTION

Checking and setting the channel status

—CHANNEL SUMMARY

You can view a summary of the channel settings and can set the scanned channels, station ID, and channel guarding.

To view the settings

1. Press the MENU buttons to select CHANNEL SUMMARY.

The CHANNEL SUMMARY menu is displayed and you can view the current settings. From this menu, you can make these settings.

To set a channel for scanning

This sets the channels you can tune with the CHANNEL/HYPER SCAN (←→) button. You can also delete channels set with AUTO TUNER SETUP.

Condition:

- Before making this setting, display the CHANNEL SUMMARY menu to select the channel you want to set.

1. Press ← or → to set or delete a channel.
The scanned channels are marked J.

- This completes the setting.
To leave the menu, press the EXIT button.

To set station IDs

A four-character station name can be displayed together with the channel number.

Condition:

- Before making this setting, display the CHANNEL SUMMARY menu to select the channel you want to set.

1. Press ▼ or ▲ to move the cursor to the ID row. Press ← or → to enter the ID setting menu.
The station ID setting menu is displayed.

SCAN:

Set or cancel the selected channel with the CHANNEL/HYPER SCAN (←→) button. The preset channels are marked J. The channels preset with AUTO TUNER SETUP are also marked J.

ID:

Set a station name of up to 4 characters. You can set station names for up to 50 channels.

Ⓜ:

Channels are set that you can not watch without inputting the LOCK CODE.

Note:

- To select a channel to set while the CHANNEL SUMMARY menu is being displayed, use the CHANNEL/HYPER SCAN (←→) button. Each time you press the button lightly (1st stage), one channel each will be moved. When pressing the button strongly (2nd stage), the cursor will move to the channel of the next scan setting.

To set other channels:

With the CHANNEL/HYPER SCAN (←→) button, move the cursor to the channel you want to set and repeat Step 1.

Notes

- The station ID is displayed when a channel is selected and when YOUR FAVORITES or CATEGORY PREVIEW is selected.
- Channels for which station IDs have been set are automatically set for scanning. When you delete a preset channel from scanning, its station ID is cleared automatically too.

HANDY CHANNEL SELECTION

CHANNEL SUMMARY SET LOCK CODE

2. Press ← or → to select the character, then press the ▼ to finalize it.

As each character is finalized, the cursor moves to the next position. Repeat Step 2 to set four characters.

- This completes the setting.

Select FINISH to return to the CHANNEL SUMMARY menu. To leave the menu, press the EXIT button.

To set channel guarding (CHANNEL GUARD)

This sets channels so they can not be watched without inputting the lock code.

Condition:

- Before making this setting, display the CHANNEL SUMMARY menu to select the channel you want to set.

1. Press ▼ or ▲ to move the cursor to the Ⓜ row, then press 0.

The guarded channels are marked Ⓜ.

- This completes the setting.

To leave the menu, press the EXIT button.

To view guarded channels

1. Press the number keys to select the guarded channel.

The on-screen display appears requesting your LOCK CODE.

Note:

- Guarded channels can not be selected with the CHANNEL/HYPER SCAN (←→) button.

2. Press the number keys to input the lock code.

- The on-screen display disappears and the television changes to the channel you selected.

If the wrong LOCK CODE is entered:

"INVALID LOCK CODE" is displayed and the channel remains unchanged.

If the LOCK CODE has been forgotten:

Set another lock code.

To set the LOCK CODE

This procedure sets the lock code, which is used for the CHILD TIMER and for watching guarded channels.

1. Press the MENU buttons to select SET LOCK CODE.

The lock symbol appears.

2. Press 0 before the symbol disappears.

The SET LOCK CODE menu is displayed.

3. Press the ← or → to select the number, then press the ▼.

Repeat Step 3 to set a 3-digit LOCK CODE.

- This completes the setting.

To leave the menu, press the EXIT button.

Setting the Clock

The TV has a built-in clock which keeps and displays the current time on the screen. The timer functions won't work, and cannot be set, if this clock stops.

1. Press the MENU buttons to select SET CLOCK.

The SET CLOCK menu is displayed.

2. Press ▼ or ▲ to move the cursor, then press ◀ or ▶ to set the current time and date.

3. Press ▼ to select START CLOCK, then press ◀ or ▶ to start the clock.

"THANK YOU" is displayed and the on-screen display disappears.

Notes:

- If there is a power interruption, the clock will stop. However, if the power interruption lasts only a few minutes, the clock will be slow by the number of minutes when the power cut off. In these cases, you need to set the clock again.
- The time is given in 12-hour format.

If a timer function is selected without setting the clock:
 • "POWER INTERRUPTED WOULD YOU SET CLOCK FIRST?" appears on the screen.
 • If you select YES, the SET CLOCK menu is displayed. Set the clock.
 • Once the clock is set, the display returns to timer setting mode and you are able to set the timer.
 • If you select NO, time setting mode ends and a message appears telling you that the timer cannot be set.

AM: To set the morning time.
PM: To set the afternoon and evening time.

Sleep Timer operation

The TV will turn off even after you fall asleep while watching it.

Condition:

- The built-in clock must be set. (Refer to page 24.)

1. Press the SLEEP TIMER to set the duration.

Each time you press SLEEP TIMER, the duration increases 15 minutes.

0 → 15 → 30 → 45 → 60 → 75 → 90 → 180

Notes:

- Once the SLEEP TIMER operates, its setting will be canceled.
- If the TV is turned off or if there is a power interruption, the SLEEP TIMER will be canceled.
- The SLEEP TIMER can be set to turn off up to 180 minutes after the current time.
- If the clock is not working, the SLEEP TIMER cannot be set.
- 20 seconds prior to turning off the TV, "GOOD NIGHT! PUSH SLEEP TIMER BUTTON TO EXTEND" will be displayed on the screen. If you press SLEEP TIMER when this message appears on the screen, setting will be delayed by 15 minutes.

Timer operation for the desired programs —DUAL ON TIMER

The TV turns on at the set time, and the channel changes to the one you have set. Up to 2 programs can be set.

Condition:

- The built-in clock must be set. (Refer to page 24.)
- If necessary to select the broadcast mode for the channels you will set (Refer to step 3 on page 10).

1. Press the MENU buttons to select DUAL ON TIMER.

The DUAL ON TIMER menu is displayed.

2. Press the MENU buttons to make each setting.

1. Press ◀ or ▶ to select Timer 1 or 2.
2. Press ▼ to move the cursor, then press ◀ or ▶ to set the time for the television to come on.
3. Press ▼ to move the cursor, then press ◀ or ▶ to set the channel.
4. Press ▼ to move the cursor, then press ◀ or ▶ to select YES.

3. Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.

The settings you have made are stored and the television returns to the menu screen.

- This completes the setting. To leave the menu, press the EXIT button. When you switch off the power, the POWER ON TIMER lamp glows dimly.

Turning the TV ON/OFF at a set time, every day —HOME SITTER

You can turn on the TV to a set channel at a set time, and then turn it off at a set time.

Condition:

- The built-in clock must be set. (Refer to page 24.)
- If necessary to select the broadcast mode for the channels you will set (Refer to step 3 on page 10).

1. Press the MENU buttons to select HOME SITTER.

The HOME SITTER menu is displayed.

2. Press the MENU buttons to make each setting.

1. Press ◀ or ▶ to set the times for the TV to come on and go off.
2. Press ▼ to move the cursor, then press ◀ or ▶ to set the channel.
3. Press ▼ to move the cursor, then press ◀ or ▶ to select YES.

(Continued on the next page)

Notes:

- Once the DUAL ON TIMER operates its setting will be canceled.
- If there is a power interruption, the DUAL ON TIMER will be canceled.
- If no operation is done within two hours after the TV turns on by the DUAL ON TIMER, the TV will turn off automatically.
- If the clock is not working, the DUAL ON TIMER cannot be set.

1: DUAL ON TIMER 1
 2: DUAL ON TIMER 2

AM: To set the time for the morning.
PM: To set the time for the afternoon and evening.

Note:

- The DUAL ON TIMER cannot be set for channels set under CHANNEL GUARD. (Refer to page 23.)

Notes:

- If there is a power interruption, the HOME SITTER setting will be canceled.
- If the clock is not working, the HOME SITTER cannot be set.

AM: To set the time for the morning.
PM: To set the time for the afternoon and evening.

Note:

- The HOME SITTER cannot be set for channels set under CHANNEL GUARD. (Refer to page 23.)

TIMER OPERATION

3. Press **▼** to move the cursor to **FINISH**, then press **◀** or **▶** to select it.

The settings you have made are stored and the TV returns to the menu screen.

- This completes the setting. To leave the menu, press the **EXIT** button. When you switch off the power, the **POWER/ON** TIMER lamp glows dimly.

Turning OFF the TV at a set time, every day —CHILD TIMER

Your TV can be turned off at a set time, every day. No picture will appear for 4 hours after it has turned off, unless a correct **LOCK CODE** is entered. This timer is useful for controlling the TV viewing time for children.

Condition:

- The built-in clock must be set. (Refer to page 24.)

1. Press the **MENU** buttons to select **CHILD TIMER**.

The **CHILD TIMER** symbol is displayed.

2. Press **0** before the symbol disappears.

The **CHILD TIMER** menu is displayed.

3. Press the **MENU** buttons to make each setting.

1. Press **◀** or **▶** to set the time for the television to go off.
2. Press **▼** to move the cursor to **YES**, then press **◀** or **▶** to select it.

4. Press **▼** to move the cursor to **FINISH**, then press **◀** or **▶** to select it.

The settings you have made are stored and the TV returns to the menu screen.

- This completes the setting. To leave the menu, press the **EXIT** button.

To watch the TV within 4 hours after it has been turned OFF by **CHILD TIMER**.

- 1 Press **POWER**.

"PLEASE ENTER LOCK CODE BY 10 KEY PAD TO UNLOCK IT." is displayed against a blue background.

2. Press the number keys to enter the **LOCK CODE** number.

- The on-screen display disappears and a picture appears on the screen.

Note:

- As shipped from the factory and after a power interruption, the **LOCK CODE** will be "0000". To change the **LOCK CODE**, see the **LOCK CODE** section. The **LOCK CODE** cannot be set. Refer to "To set the **LOCK CODE**" on page 23.

If the wrong **LOCK CODE** is entered: "INVALID LOCK CODE" will be displayed and the blue background will remain.

If the **LOCK CODE** has been forgotten: Cancel the **CHILD TIMER** setting.

TIMER OPERATION/OTHER FEATURES

CHILD TIMER
DISPLAY
NOISE MUTE

Displaying the current TV status

—DISPLAY

You can display the timer settings, current time, and channel number.

1. Press **DISPLAY** repeatedly.

Note:

- While the clock is not working, "CLOCK NOT SET" is displayed instead of the current time.
- Date set as a **SPECIAL DAY**
- The display for a **SPECIAL DAY** is shown on the second page.

- 1 Channel being received or the input mode
- 2 Current time and date
- 3 Set status of the **SLEEP TIMER**
- 4 Appears when the **CHILD TIMER** is operating
- 5 Appears when the **HOME SITTER** is operating
- 6 Set status of the **DUAL ON TIMER**

Turning Non-broadcasting channels blue

—NOISE MUTE

You can turn the picture noise, which appears for channels not receiving broadcast signals, into a quiet solid blue screen.

1. Press the **MENU** buttons to select **NOISE MUTE**.

2. Press **◀** or **▶** to select **ON** or **OFF**.

- This completes the setting. To leave the menu, press the **EXIT** button.

ON : To set Noise Mute.
OFF: Not to set Noise Mute.

Viewing the Closed Captions

—CLOSED CAPTION

You can watch the closed captions of a TV broadcast, a video tape or a video disc.

Condition:

- Tune the TV to a program or video source which contains a closed caption.

1. Press CLOSED CAPTION repeatedly.

→ CLOSED CAPTION → TEXT → OFF

Note:
• The closed caption may not be correctly displayed for cable TV or a video source with copy guard.

- Addressed caption may not appear properly due to signal reception condition. In this case, press the CLOSED CAPTION button again to make the setting, or return the channel.

CLOSED CAPTION:

To view the caption

TEXT:

To view teletext

(If a black background appears while watching video tapes and discs without closed caption, set this function to OFF).

OFF:

Not to display either one

To set CAPTION mode and TEXT mode

1. Press the MENU buttons to select CLOSED CAPTION.

The CLOSED CAPTION menu is displayed.

CLOSED CAPTION	
CAPTION	OFF
TEXT	ON
BACKGROUND	BLACK CLEAR
EXIT	FINISH
CLOSED CAPTION	

2. Press the MENU buttons to make each setting.

1. Press ◀ or ▶ to set CAPTION mode.
 2. Press ▼ to move the cursor, then press ◀ or ▶ to set TEXT mode.
 3. Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.
- The settings you have made are stored and the TV returns to the menu screen.

- This completes the setting.

To leave the menu, press the EXIT button.

To select the closed captions BACKGROUND

1. Press the MENU buttons to select CLOSED CAPTION.

The CLOSED CAPTION menu is displayed.

CLOSED CAPTION	
CAPTION	OFF
TEXT	ON
BACKGROUND	BLACK CLEAR
EXIT	FINISH
CLOSED CAPTION	

2. Press the MENU buttons to make each setting.

1. Press ▼ to move the cursor to BACK GROUND, then press ◀ or ▶ to set BLACK or CLEAR.
 2. Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.
- The settings you have made are stored and the TV returns to the menu screen.

- This completes the setting. To leave the menu, press the EXIT button.

Messages for Special Days

— SPECIAL DAY

You can set the TV to display a reminder when you switch it on a special day (birthday, anniversary, etc.)

Condition:

- The built-in clock must be set. (Refer to page 24.)

1. Press the MENU buttons to select SPECIAL DAY.

The SPECIAL DAY list is displayed.

SPECIAL DAY	
ITEM	NAME DATE
ANNIVERSARY	JUN 15 FEB 10
BIRTHDAY	JUN 15 FEB 10
HOLIDAY	JUN 15 FEB 10
EXIT	FINISH
CLOSED CAPTION	

2. Press ▼ or ▲ to move the cursor to the setting position, then press ◀ or ▶ to select it.

The SPECIAL DAY setting screen is displayed.

SPECIAL DAY	
ANNIVERSARY	BIRTHDAY
ITEM	NAME DATE
ANNIVERSARY	JUN 15 FEB 10
BIRTHDAY	JUN 15 FEB 10
HOLIDAY	JUN 15 FEB 10
EXIT	FINISH
CLOSED CAPTION	

3. Press ▼ or ▲ to move the cursor to the setting item (ANNIVERSARY, HOLIDAY, BIRTHDAY, CHOICE), then press ◀ or ▶ to select it.

When you select CHOICE:
You can set an item yourself. Move the cursor with ▼ or ▲ and press ◀ or ▶ to select a character. You can set an item up to 11 characters long.

4. Press the MENU buttons to make each setting.

1. Press ◀ or ▶ to select a character, then press ▼ to finalize it.
When one character is finalized, the cursor moves to the next one. Repeat this process to set a five-character name.
 2. Press ◀ or ▶ to set the month and day.
 3. Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.
- The settings you have made are stored and the TV returns to the SPECIAL DAY list.

5. Press ▼ to move the cursor to FINISH, then press ◀ or ▶ to select it.

- This completes the setting.
To leave the menu, press the EXIT button.

Listening to the sound through External Speakers

—OUTPUT SPEAKERS

1. Set the EXT SPKR switch to MAIN.

Setting the EXT SPKR switch:
The output sound differs depending on the switch setting.

Switch setting	Built-in speakers	Speakers connected to the EXT SPKR jacks	Sound output
MAIN	No sound	No sound	Normal sound
SURROUND 1	No sound	Normal sound	Normal sound
SURROUND 2	Normal sound	Surround effect sound	Surround effect sound

Switching to the Surround Speakers —SURROUND

Surround effect is produced by the rear side left/right external speakers. You can enjoy stereoscopic live sound.

Conditions:

- The effect is produced only from stereo sound. If the sound source is monaural, no sound will come from the external speakers.
- Adjust the balance of sound to the center. (Refer to page 17.)

When an audio component is connected

Set the EXT SPKR switch to "SURROUND 1"

When an audio component is not connected

Set the EXT SPKR switch to "SURROUND 2"

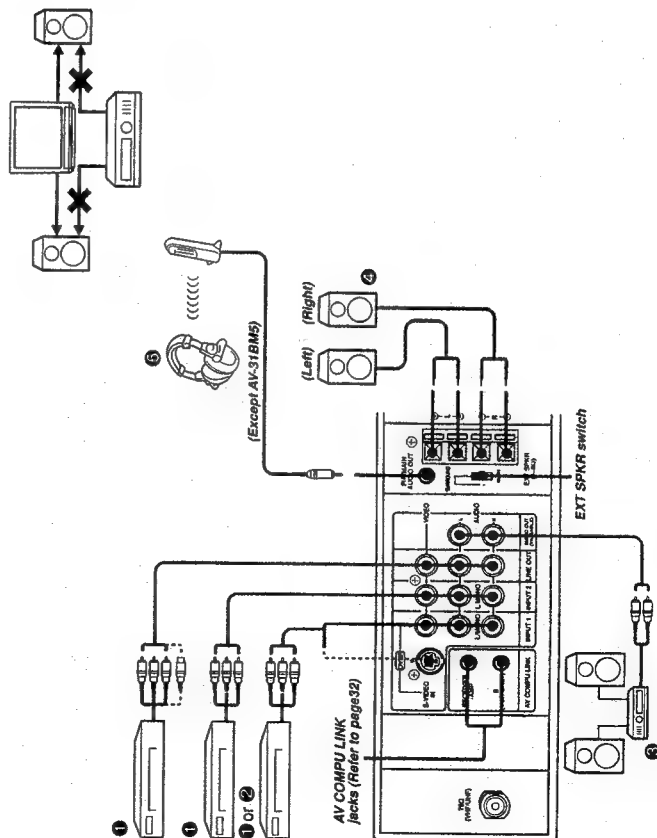

Connecting External Devices

—CONNECTION DIAGRAM

Conditions:

- Before connecting external devices, be sure to disconnect the TV from the AC outlet.
- When you want to view from a connected device such as a VCR, change the TV input mode with TV/VIDEO. (Refer to step 2 on page 10.)

- 1 VCR
- 2 S-VHS VCR
- 3 Audio component
- 4 External speakers
- 5 Cordless headphones

Notes:

- Refer to the "Note" on page 6 and to the manuals provided with the other devices.
- Interference from connected devices may cause the picture quality to deteriorate. If picture noise occurs, turn off devices that you are not using or move them further apart.
- Connect the video signal of S-VHS VCR to S-VIDEO jack.
- Do not connect the audio output of any other device to the speakers connected to this TV. It may damage the TV or the other devices.

AV COMPU LINK connection —AV COMPU LINK

This TV set is capable of using an AV COMPU LINK. If the TV set is connected to a JVC AV Compu Link-capable VCR and/or hi-fi receiver (or amplifier), automatic switching functions are available.

If the TV set is connected to a JVC AV Compu Link-capable VCR, simply insert a video cassette (with its safety tabs removed) such as a prerecorded video into the VCR, the TV set turns on automatically and the video playback is displayed on the screen, without any manual switching necessary.

If the TV set is connected via a JVC AV Compu Link-capable hi-fi receiver (or amplifier) to a JVC AV Compu Link-capable VCR, you can do the following:

- Insert a video cassette (with its safety tabs removed) into the VCR. Both the TV set and receiver (or amplifier) turn on automatically and the video playback is displayed on the screen.
- Change the input source selector of the receiver (or amplifier) to the video input mode. The TV set's input source selector will also be set to the video input mode [VIDEO-1 or VIDEO-2] automatically.
- Turn on (or off) the receiver (or amplifier). Both the TV set and VCR are also turned on (or off) automatically. For example, if the input source selector of the receiver (or amplifier) is set to "VCR1" and the receiver (or amplifier) is turned on, the TV set and VCR connected to VCR1 are turned on.

In addition to connecting video and audio signal cables, connect the AV Compu Link cable to the AV COMPU LINK jacks (VCR ONLY or RECEIVER/AMP jacks) to transmit the control signals via the AV Compu Link cable.

Connecting an AV COMPU LINK-Capable VCR

Connecting an AV COMPU LINK-Capable S-VHS VCR

Connecting an AV COMPU LINK-Capable Receiver (or Amplifier)

- Note:
- If the AV Compu Link cable is connected to the TV set's RECEIVER/AMP jack, the TV set's remote control sensor does not detect the signals from remote control. Direct the remote control's signals at the receiver (or amplifier). Signals from the remote control are transmitted via the AV Compu Link cable to the TV set.

Troubleshooting

- If the power cord plug is disconnected from the AC outlet, or the TV antenna is causing problems, you may think there is a problem with the TV itself; be sure to check the following items before calling for service.

Important:
• Review all the instructions written in this user guide.

■ GENERAL

Problem	Cause	Action
No power supply	Is the power cord plug disconnected?	Insert the plug into AC outlet. (Refer to page 7.)
No picture or sound	Is the antenna disconnected?	Check the antenna connections. (Refer to page 7.)
	Is the antenna facing in the correct direction?	Position the antenna in the correct direction.
	Is the input mode (TV, VIDEO-1,2) set to an incorrect position?	Press TV/VIDEO to engage the correct mode. (Refer to page 10.)
	Is the broadcast mode set properly?	Set the correct tuner mode with the MENU button. (Refer to page 10.)
	Is the CHILD TIMER operating?	Enter the LOCK CODE. (Refer to page 25.)
Inoperable remote control	Is the TV station the problem?	Watch another channel. If there are no problems with another channel, the TV station may be the problem.
	Are batteries exhausted?	Replace the batteries. (Refer to page 8.)
	Are the batteries' +/- polarity placed correctly?	Re-install the batteries correctly. (Refer to page 8.)
	Is the remote control too far from the TV?	Operate the remote control within approx. 23 ft (7 meters) of the TV.
The channel cannot be selected.	Are there any obstructions between the remote control and TV?	Remove any obstructions between the remote control and TV.
	Is the TV/CATV selector set properly?	When operating the TV, set the TV/CATV selector to TV.
	The TV does not receive remote control commands for some reason.	Press POWER on the TV to turn it off, then turn it on again.
	Have the channels been set?	Preset the channels. (Refer to page 9.)
The power shuts off automatically	Is the SLEEP TIMER set?	Press the remote control number keys to select the channel, then enter the LOCK CODE. (Refer to page 23.)
	Is the CHILD TIMER set?	When operating the TV, set the TV/CATV selector to TV.
The TV clock is incorrect or the clock has stopped.	Was there a power interruption?	Press POWER to turn on the TV again. (Refer to page 24.)
	Was there a power interruption?	Press POWER to turn on the TV, then enter the LOCK CODE. (Refer to page 26.)
The timer operation does not work.	Was there a power interruption?	Set the clock correctly. (Refer to page 24.)
	Was there a power interruption?	If there is a power interruption, the timer operation will be canceled. Set it again. Also check that the clock is correct. (Refer to pages 24 to 26.)

■ PICTURE

Problem	Cause	Action
Poor colors	Are the COLOR and TINT controls adjusted incorrectly?	Adjust the COLOR and TINT controls. (Refer to page 16.)
Lines or streaks in the picture (interference)	Has the THEATER STATUS mode been set?	Cancel the THEATER STATUS. (Refer to page 16.)
	Is it a black and white program?	Change the channel and watch a color program.
	Could there be interference from a personal computer, TV, VCR, audio component, jamming by a radio station, etc.?	Move the components apart until the interference is eliminated. Move the antenna to a different position or direction.
Spotted picture (crosstalk)	Could there be interference from a hair dryer, electric cleaner, neon sign, high tension wire, automobile, motorcycle, etc.?	Move the antenna away from the source of interference. Replace the antenna cable with a coaxial cable, which is less prone to interference.
Double pictures (ghost)	Could the direct signals from a TV broadcast station be affected by reflected signals from mountains or buildings, etc.?	Move the antenna to a different position, height or direction. Replace with an antenna having better directional characteristics.
Snowy picture (image noise)	Is the external antenna out or disconnected?	Check the antenna connection. (Refer to page 7.)
	Is the antenna turned the wrong direction due to strong wind, etc.?	Position the antenna correctly
	Is the antenna damaged?	Replace or repair the antenna.
The screen turns blue.	Is a non-broadcasting channel selected?	Select a broadcast channel.
When a video tape is played, a blue background appears first.	Is Noise Mute on?	Turn off Noise Mute. (Refer to page 27.)
	Is Noise Mute off?	Turn off Noise Mute. (Refer to page 27.)
The second picture does not appear on the screen.	Is the VCR or playback device connected to the TV?	Connect the VCR or playback device to the TV and start playback. (Refer to page 30.)
TV screen has a black square covering 80% of the screen.	Is the Closed Caption Text Mode on?	Press CLOSED CAPTION button to turn Off Text Mode. (Refer to page 28.)

■ SOUND

Problem	Causes	Action
Bilingual/stereo broadcasts cannot be heard.	Is the MTS mode set correctly?	Set it to STEREO or SAP mode. (Refer to page 17.)
No sound is output from the TV's speakers.	Is the EXT SPKR switch set to "MAIN" or "SURROUND 1"?	Set the EXT SPKR switch to "SURROUND 2". (Refer to page 31.)

- The following are normal occurrences and are not the result of TV malfunctions:
- When you touch the CRT (Cathode Ray Tube: Picture tube) surface, you might feel a slight change of static electricity. This is because the CRT contains static electricity; it does not affect the human body.
 - Your TV may emit a crackling sound due to a sudden change in temperature. There is no problem unless the picture or sound is abnormal.
 - When a still bright image (of a white dress, for example) appears on the screen, the image may be colored. This problem occurs in all CRTs, and as the bright image disappears, such coloration also disappears.

CABLE TV CHANNEL CONVERSION CHART

In addition to normal TV reception from an antenna for VHF (Channels 2 to 13) and UHF (Channels 14 to 69), your TV set is equipped to receive non-standard channels (A to 11, Mid band (A to 11), Super band (W to 44), Hyper band (W-1 to W-28) and Ultra band (W-29 to W-64) can be received by using the channel selections as shown in the following chart.

Note:
• Reception of channel A-5 (95) of the TV set's on-screen CABLE channel numbers is not recommended for your TV set.

• Regular cable channel designations
• Your TV set's corresponding on-screen CABLE channel numbers

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65	66	67	68	69	70	71	72	73	74	75	76	77	78	79	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	95	96	97	98	99	100

HOW TO LOCATE YOUR JVC SERVICE CENTER

TOLL FREE: 1-800-537-5722

Dear customer:
In order to receive the most satisfaction from your purchase, read the instruction booklet before operating the unit. In the event that repair is necessary, or for the address nearest your location, please refer to the factory service center list below or within the Continental United States, call 1-800-537-5722 for your authorized service. Remember to retain your Bill of Sale for Warranty Service.

~JVC

JVC SERVICE & ENGINEERING

COMPANY OF AMERICA

Sophisticated electronic products may require occasional service. Just as quality is a keyword in the engineering and production of the wide array of JVC products, service is the key to maintaining the high level of performance for which JVC is world famous. The JVC service and engineering organization stands behind our products.

NATIONAL HEADQUARTERS
JVC SERVICE & ENGINEERING COMPANY OF AMERICA
DIVISION OF US JVC CORP.
107 Little Falls Road
Fairfield, NJ 07004-2105

If you ship the product...

Pack your JVC unit in the original carton or one of equivalent size and strength. Enclose, with the unit, a letter stating the problem or symptom that exists and also a copy of the receipt or bill of sale you received when you purchased your JVC unit. Print your home return address on the outside and the inside of the carton. Send to the appropriate JVC Factory Service Center as listed above.

Don't service it yourself.

CAUTION

To prevent electrical shock, do not open the cabinet. No user serviceable parts inside. Refer servicing to qualified service personnel.

ACCESSORIES

To purchase accessories for your JVC product, you may contact your local JVC Dealer. Or from the 48 Continental United States call toll free: 800-882-2345.

SPECIFICATIONS

AV-27BP5

Item	Content
Dimensions (W×H×D)	25-7/8" × 23-1/8" × 20-1/2" / 65.5cm × 58.6cm × 52.0cm
Weight	76.3lbs / 37.6kg
TV System and Color, Sound System	
TV RF System	CCIR(M)
Color, Sound System	NTSC,BTSC (Multichannel Sound)
TV Receiving Channels and Frequency	
VL Band	(02~06) 54MHz~88MHz
VH Band	(07~13) 174MHz~216MHz
UHF Band	(14~69) 470MHz~806MHz
CATV Receiving Channels and Frequency (Quartz Synthesizer System)	
Low Band	(02~06,) by (02~06)
High Band	(07~13) by (07~13)
Mid Band	(A~I) by (14~22)
Super Band	(J~W) by (23~36)
Hyper Band	(W + 1~W + 28) by (37~64)
ULTRA Band	(W + 29~W + 84) by (65~94,100~125)
Sub Mid Band	(A-8, A-4~A-1) by (01, 96~99)
TV / CATV Total Channel	180 Channels
Intermediate Frequency	
Video IF Carrier	45.75MHz
Sound IF Carrier	41.25MHz (4.5MHz)
Color Sub Carrier	3.58MHz
Antenna Input Impedance	75Ω (VHF / UHF) Terminal, F-Type Connector
Power Input	120V AC, 60Hz
Power Consumption	140W (max.) ,100W (avg.) [US]
Input current	1.9A [CA]
Picture Tube	27"(69cm) measured diagonally, Full Square
Viewable Picture Size (W×H)	21-5/16" × 16" / 54.1cm × 40.6cm
High Voltage	31.0kV ± 1.3kV (at zero beam current)
Speaker	2" × 4-3/4" (5 × 12cm) Oval Type, × 2
Speaker Output Terminal	6~8Ω
Audio Power Output	5W + 5W
Input (1,2)	Video : 1 Vp-p 75Ω (RCA pin jack) Audio : 500 mV rms (-4dBs), High Impedance (RCA pin jack)
Line Output	Video : 1 Vp-p 75Ω (RCA pin jack) Audio : 500 mV rms (-4dBs) Low Impedance (400Hz when modulated 100%) (RCA pin jack)
S-Video Input	Y:1 Vp-p positive (negative sync provided,when terminated with 75Ω) C:0.286 Vp-p (burst signal, when terminated with 75Ω)
Variable Audio Output	More than 0~1550mV rms (+ 6dBs) Low Impedance (400Hz when modulated 100%) (RCA pin jack)
AV Compulink Input	Audio : 3.5mm mini jack VCR : 3.5mm mini jack
PIP/MAIN Audio out put	3.5mm Stereo mini jack
Tube	1
IC	32(In TV), 1(In Remocon)
Transistor	117(In TV), 2(In Remocon)
Remote Control Unit	RM-C723

SAFETY PRECAUTIONS

1. The design of this product contains special hardware, many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Service should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the products should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacturer of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the parts list of Service manual. **Electrical components having such features are identified by shading on the schematics and by (⚡) on the parts list in Service manual.** The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement part shown in the parts list of Service manual may cause shock, fire, or other hazards.
4. **Use isolation transformer when hot chassis.**
The chassis and any sub-chassis contained in some products are connected to one side of the AC power line. An isolation transformer of adequate capacity should be inserted between the product and the AC power supply point while performing any service on some products when the HOT chassis is exposed.
5. **Don't short between the LIVE side ground and ISOLATED (NEUTRAL) side ground or EARTH side ground when repairing.**
Some model's power circuit is partly different in the GND. The difference of the GND is shown by the LIVE (⚡) side GND, the ISOLATED (NEUTRAL) (⚡) side GND and EARTH (⊕) side GND. Don't short between the LIVE side GND and ISOLATED (NEUTRAL) side GND or EARTH side GND and never measure with a measuring apparatus (oscilloscope etc.) the LIVE side GND and ISOLATED (NEUTRAL) side GND or EARTH side GND at the same time.
If above note will not be kept, a fuse or any parts will be broken.
6. If any repair has been made to the chassis, it is recommended that the B₁ setting should be checked or adjusted (See ADJUSTMENT OF B₁ POWER SUPPLY).
7. The high voltage applied to the picture tube must conform with that specified in Service manual. Excessive high voltage can cause an increase in X-Ray emission, arcing and possible component damage, therefore operation under excessive high voltage conditions should be kept to a minimum, or should be prevented. If severe arcing occurs, remove the AC power immediately and determine the cause by visual inspection (incorrect installation, cracked or melted high voltage harness, poor soldering, etc.). To maintain the proper minimum level of soft X-Ray emission, components in the high voltage circuitry including the picture tube must be the exact replacements or alternatives approved by the manufacturer of the complete product.
8. Do not check high voltage by drawing an arc. Use a high voltage meter or a high voltage probe with a VTVM. Discharge the picture tube before attempting meter connection, by connecting a clip lead to the ground frame and connecting the other end of the lead through a 10kΩ 2W resistor to the anode button.
9. When service is required, observe the original lead dress. Extra precaution should be given to assure correct lead dress in the high voltage circuit area. Where a short circuit has occurred, those components that indicate evidence of overheating should be replaced. Always use the manufacturer's replacement components.

10. **Isolation Check**
(Safety for Electrical Shock Hazard)
After re-assembling the product, always perform an isolation check on the exposed metal parts of the cabinet (antenna terminals, video/audio input and output terminals, Control knobs, metal cabinet, screwheads, earphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.
 - (1) **Dielectric Strength Test**
The isolation between the AC primary circuit and all metal parts exposed to the user, particularly any exposed metal part having a return path to the chassis should withstand a voltage of 1100V AC (r.m.s.) for a period of one second.
(... Withstand a voltage of 1100V AC (r.m.s.) to an appliance rated up to 120V, and 3000V AC (r.m.s.) to an appliance rated 200V or more, for a period of one second.)
This method of test requires a test equipment not generally found in the service trade.
 - (2) **Leakage Current Check**
Plug the AC line cord directly into the AC outlet (do not use a line isolation transformer during this check.). Using a "Leakage Current Tester", measure the leakage current from each exposed metal part of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground (water pipe, etc.). Any leakage current must not exceed 0.5mA AC (r.m.s.).
• **Alternate Check Method**
Plug the AC line cord directly into the AC outlet (do not use a line isolation transformer during this check.). Use an AC voltmeter having 1000 Ω per volt or more sensitivity in the following manner. Connect a 1500Ω 10W resistor paralleled by a 0.15μF AC-type capacitor between an exposed metal part and a known good earth ground (water pipe, etc.). Measure the AC voltage across the resistor with the AC voltmeter. Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Any voltage measured must not exceed 0.35V AC (r.m.s.). This corresponds to 0.5mA AC (r.m.s.).
-
11. **High voltage hold down circuit check.**
After repair of the high voltage hold down circuit, this circuit shall be checked to operate correctly.
See item "How to check the high voltage hold down circuit".

■ **ONLY CANADA**

This mark shows a fast operating fuse; the letters indicated below show the rating.

FEATURES

- New chassis design enables use of a main board with simplified circuitry.
- Comb filter improved picture quality.
- Super COMMAND AI remote control with multi-color on-screen "Menu" display, allowing interactive, total TV operation.
- Provided with miniature tuner (TV / CATV)
- Full-square CRT (cathode ray tube) reproduces fine textured picture in every detail.
- PLL synthesizer system TV / CATV totaling 180 channels.
- AV COMPU LINK terminals allow simultaneous mode switching of the TV, connected receiver (or amplifier) and/or VCR.
- Closed-caption broadcasts can be viewed.
- The AV input terminal, sound input, external speaker output terminal, and audio output terminal allow for a variety of connections to another AV equipment.
- S-VIDEO input terminal for taking best advantage of Super VHS.
- Variable audio output terminal.
- Built-in MTS & SURROUND circuit with A / V system.
- Built-in PIP system (Except : AV-31BM5).
- An auto demonstration function demonstrates the features of this model.

DIFFERENCE OF MODELS

MODEL	PIP MODULE	VM CIRCUIT	DBF. CIRCUIT
AV-27BP5(US/CA)	YES	NON	NON
AV-31BM5(US/CA)	NON	NON	NON
AV-31BP5(US/CA)	YES	NON	NON
AV-35BP5(US/CA)	YES	YES	YES

SPECIFIC SERVICE INSTRUCTIONS

DISASSEMBLY PROCEDURE FOR AV-27/31BP5 & AV-31BM5

REMOVING THE REAR COVER

1. Unplug the power supply cord and remove the screws marked **A** as shown in Fig. A(AV-27BP5) & Fig. B(AV-31BP5/BM5).
- * When reinstalling the rear cover, carefully push it inward after inserting the main board into the rear cover groove.

Fig. B

Fig. A

REMOVING THE CHASSIS

- * After removing the rear cover.
1. As shown in Fig. C slide and pull out the CHASSIS BASE in the direction of arrow marked **A**.
(If necessary, take off the wire clamp and connectors, etc.)

Fig. C

REMOVING THE AV TERMINAL BOARD & AV TERMINAL PWB

- * After removing the rear cover.
1. Remove the five screws marked **A** and two screws marked **B** as shown in Fig. D.
2. While wideing the two claws marked **C**, remove the AV TERMINAL BOARD.
3. Raise the AV TERM. PWB in the arrow direction marked **D** as shown in Fig. D.
4. The connector (CN003) will then be free and the AV TERMINAL PWB can be removed.

Fig. D

REMOVING THE PIP PWB (Except AV-31BM5)

* After removing the rear cover.

1. While widening the three claws marked ① as shown in Fig. E.
2. Raise the PIP PWB in the arrow direction marked ② as shown in Fig. E.
3. The connector will then be free and the PIP PWB can be removed.

Fig.E

REMOVING THE FRONT CONTROL PWB

* After removing the rear cover & the chassis.

1. While widening the two claws marked ① as shown in Fig. F.
 2. As show in Fig. F slide and pull out the FRONT CONTROL PWB in the direction of arrow marked ②.
- * If necessary, take off the wire clamp and connectors, etc.

Fig. F

AN EXAMPLE OF PLACEMENT FOR SERVICE

1. As shown in Fig. G, place the unit for service.
 2. When the chassis, sub PWB Ass'y etc, have been removed, the wire clamp, connector, earth wire etc, which were also detached together must be reattached to their original places in order to make preparations for service.
 3. While taking care that there is no short circuit with the conductor section etc., place the unit. Insulate the unit with a cardboard, or the like, if necessary.
 4. After making sure that there is no short circuit and other obstructive matters with the unit turn on electricity for service.
- * When conducting a check with power supplied, be sure to confirm that the CRT earth wire is connected to the CRT SOCKET PWB Ass'y and the POWER / DEF PWB Ass'y.

Fig. G

WIRE CLAMPING AND CABLE TIES

1. Be sure to clamp the wire.
2. Never remove the cable tie used for tying the wires together. Should it be inadvertently removed, be sure to tie the wires with a new cable tie.

DISASSEMBLY PROCEDURE FOR AV-35BP5

REMOVING THE REAR COVER

1. Unplug the power supply cord and remove the fifteen screws marked **A** as shown in Fig. A.
- * When reinstalling the rear cover, carefully push it inward after inserting the main board into the rear cover groove.

Fig. A

REMOVING THE CHASSIS

1. Loosen the one screw marked **A** of the front control base as shown in Fig. B.
2. As shown in Fig B, slide and pull out the chassis in the direction of arrow. (If necessary, take off the wire clamp and connectors..., etc.)

Fig. B

REMOVING THE AV TERMINAL BOARD & AV TERMINAL PWB

- * After removing the rear cover.
1. Remove the five screws marked **A** and two screws marked **B** as shown in Fig. C.
 2. While wideing the two claws marked **C**, remove the AV TERMINAL BOARD.
 3. Raise the AV TERMI. PWB in the arrow direction marked **D** as shown in Fig. C.
 4. The connector (CN003) will then be free and the AV TERMINAL PWB can be removed.

Fig. C

REMOVING THE PIP PWB

* After removing the rear cover.

1. While widening the three claws marked (A) as shown in Fig. D.
2. Raise the PIP PWB in the arrow direction marked (B) as shown in Fig. D.
3. The connector will then be free and the PIP PWB can be removed.

Fig. D

REMOVING THE SPEAKER GRILL

* After removing the rear cover.

1. Remove the two screws marked (A) as shown in Fig. E.
2. While widening the claw marked (B), remove the speaker grill as shown in Fig. E.
3. Use same procedure when removing the other hand speaker grill.

Fig. E

AN EXAMPLE OF PLACEMENT FOR SERVICE

1. As shown in Fig. F, place the unit for service.
 2. When the chassis, sub PWB Ass'y etc, have been removed, the wire clamp, connector, earth wire etc, which were also detached together must be reattached to their original places in order to make preparations for service.
 3. While taking care that there is no short circuit with the conductor section etc., place the unit.
Insulate the unit with a cardboard, or the like, if necessary.
 4. After making sure that there is no short circuit and other obstructive matters with the unit turn on electricity for service.
- * When conducting a check with power supplied, be sure to confirm that the CRT earth wire is connected to the CRT SOCKET PWB Ass'y and the POWER / DEF PWB Ass'y.

WIRE CLAMPING AND CABLE TIES

1. Be sure to clamp the wire.
2. Never remove the cable tie used for tying the wires together.
Should it be inadvertently removed, be sure to tie the wires with a new cable tie.

Fig. F

REMOVING THE CRT.

- Relacement of the CRT should be performed by two or more persons.
- After removed the rear cover, chassis and sp grill ass'y etc.,
- 1. Putting the CRT change table on soft cloth, the CRT change table should also be covered with such soft cloth. (shown in Fig. G)
- 2. While keeping the surface of CRT down, mount the TV set on the CRT change table balanced will as shown in Fig. H.
- 3. Remove four nuts marked by arrows with a box type screw driver as shown in Fig. H.
- Since the cabinet will drop when nuts have been removed, be sure to support the cabinet with hands.
- 4. After four nuts have been removed, put the cabinet slowly on cloth (At this time, be careful so as not to damage the front surface of the cabinet) as shown in Fig. I.
- The CRT should be assembled according to the opposite sequence of its dismantling steps.
- The CRT change table should preferably be smaller than the CRT surface, and its height be about 35cm.

Fig. G

Fig. H

Fig. I

COATING OF SILICON GREASE FOR ELECTRICAL INSULATION ON THE CRT ANODE CAP SECTION

- Subsequent to replacement of the CRT and HV transformer or repair of the anode cap, etc. by dismantling them, be sure to coat silicon grease for electrical insulation as shown in Fig. J. Wipe around the anode button with clean and dry cloth. (Fig.J) Coat silicon grease on the section around the anode button. At this time, take care so that any silicon grease does not stick to the anode button.(Fig.K)

★ Silicon grease product No. : KS - 650N

MEMORY IC REPLACEMENT

MEMORY IC

- This model uses a memory IC (EEPROM). The memory IC stores data needed for correct operation of the video and deflection circuits. If the IC is replaced, be sure the data (initial values) are entered in the new IC.

DATA WRITE-IN

- If the TV video, audio and other settings are to be the same as prior to replacing the memory IC, perform the following steps.
 - Before replacing the IC, refer to TABLE 1 (user settings) and to the extent possible make a note of the data for each item.
 - In the SERVICE MODE, to the extent possible make a note of the setting value data for each item.
 - PICTURE SERVICE MODE No.1-No.29
 - SOUND SERVICE MODE No.1-No.12
 - PIP SERVICE MODE No.1-No.40
 - OTHERS MODE No.1-No.29
- If the items are difficult to read due to sync disturbance or other problem, set the input mode to where a video input signal is absent.

- Switch off the power and disconnect the power cord from the AC outlet.
- Replace the memory IC.
- Connect the power cord to the AC outlet and switch on the power.
- Use the remote controller and set the user setting values of TABLE 1 to those noted in above step 1.
- Set the input mode to where a video input signal is absent.
- Set the SERVICE ADJUSTMENT MODE (See page 2-16).
- In sequence, set the service mode setting values to those noted in above step 2. Where the setting values could not be noted, as required, refer to the reference setting values and fine adjust while observing the picture.

AV STATUS REFERENCE SETTING POSITION

REPLACEMENT OF CHIP COMPONENT

■CAUTIONS

1. Avoid heating for more than 3 seconds.
2. Do not rub the electrodes and the resist parts of the pattern.
3. When removing a chip part, melt the solder adequately.
4. Do not reuse a chip part after removing it.

■SOLDERING IRON

1. Use a high insulation soldering iron with a thin pointed end of it.
2. A 30w soldering iron is recommended for easily removing parts.

■REPLACEMENT STEPS

1. How to remove Chip parts

●Resistors, capacitors, etc

- (1) As shown in the figure, push the part with tweezers and alternately melt the solder at each end.

- (2) Shift with tweezers and remove the chip part.

●Transistors, diodes, variable resistors, etc

- (1) Apply extra solder to each lead.

- (2) As shown in the figure, push the part with tweezers and alternately melt the solder at each lead. Shift and remove the chip part.

Note: After removing the part, remove remaining solder from the pattern.

2. How to install Chip parts

●Resistors, capacitors, etc

- (1) Apply solder to the pattern as indicated in the figure.

- (2) Grasp the chip part with tweezers and place it on the solder. Then heat and melt the solder at both ends of the chip part.

●Transistors, diodes, variable resistors, etc

- (1) Apply solder to the pattern as indicated in the figure.

- (2) Grasp the chip part with tweezers and place it on the solder.

- (3) First solder lead A as indicated in the figure.

- (4) Then solder leads B and C.

SERVICE ADJUSTMENTS

BEFORE STARTING ADJUSTMENT

1. The remote controller is used for many adjustments of this model. However, some are performed in the conventional manner by adjusting circuit board parts. The adjustment procedures for this model are described in the following order.

■ B1 VOLTAGE CHECK Page 2-14

■ SCREEN VOLTAGE ADJUSTMENT Page 2-14

■ ADJUSTMENTS WITH REMOTE CONTROL UNIT Page 2-16

■ ADJUSTMENT WITH DISCRETE PARTS Page 2-27
2. Allow the set and measuring equipment ample time to warm up (at least 30 minutes).
3. Check proper AC 120V power supply input.

4. Use care not to disturb VRs and other parts not mentioned in the adjustment items.

5. Unless otherwise mentioned in the adjustment steps, use the remote controller to preset the following functions to the indicated positions.

● THEATER / AV STATUS = BRIGHT ROOM MODE (PICTURE only Max., all others to center)

(VNR, NOTCH, LIVE EFFEX = OFF)

● Audio controls : all to center

6. Refer to the adjustment parts locations on page 2-15.
- ## MEASURING EQUIPMENT & FIXTURES
- DC voltmeter or digital voltmeter

● Oscilloscope

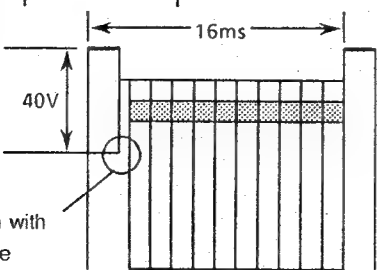

● Test pattern generator (NTSC)

More precise adjustments are enabled if resolution, pedestal and greyscale pattern outputs are available.

● TV audio multiplex signal generator

● Using remote control unit

■ ADJUSTMENT WITH REMOTE CONTROL UNIT

SERVICE ADJUSTMENT MODE ENTRY

1. Press the MENU UP / DOWN (or L / R) keys (Fig. A) to produce the screen indicated in Fig. 1, then select SET CLOCK.
2. Press the MENU L / R keys to produce the screen indicated in Fig. 2.
3. Press the MENU UP / DOWN and L / R keys to set the TIME (be sure to set to 3 : 21 AM) and DATE (any date is adequate), then produce the START CLOCK mode (Fig. 2).
4. Press the MENU L / R keys to produce a blinking "THANK YOU" (Fig. 3).
5. While "THANK YOU" is blinking, press the MUTE key, then immediately press the MENU UP / DOWN keys to produce the Fig. 5 SERVICE MODE screen with blinking message.
6. While the message is blinking, press the MENU UP / DOWN keys to produce the Fig. 5 SERVICE MODE MENU screen.
7. Select the mode to be adjusted from the Fig. 5 screen with the MENU UP / DOWN keys.
8. When the MENU UP / DOWN keys are pressed, the Fig. 6 screen is produced and location (A) blinks.
9. When the MENU UP / DOWN keys are pressed according to the blinking (A) location, the Fig. 7 SERVICE ADJUSTMENT ITEMS are produced.
10. At this screen, adjust each SERVICE ADJUSTMENT ITEM.

● REMOTE CONTROLLER KEY LOCATIONS

- The MENU keys include UP / DOWN and L (LEFT) / R (RIGHT).

Fig. A

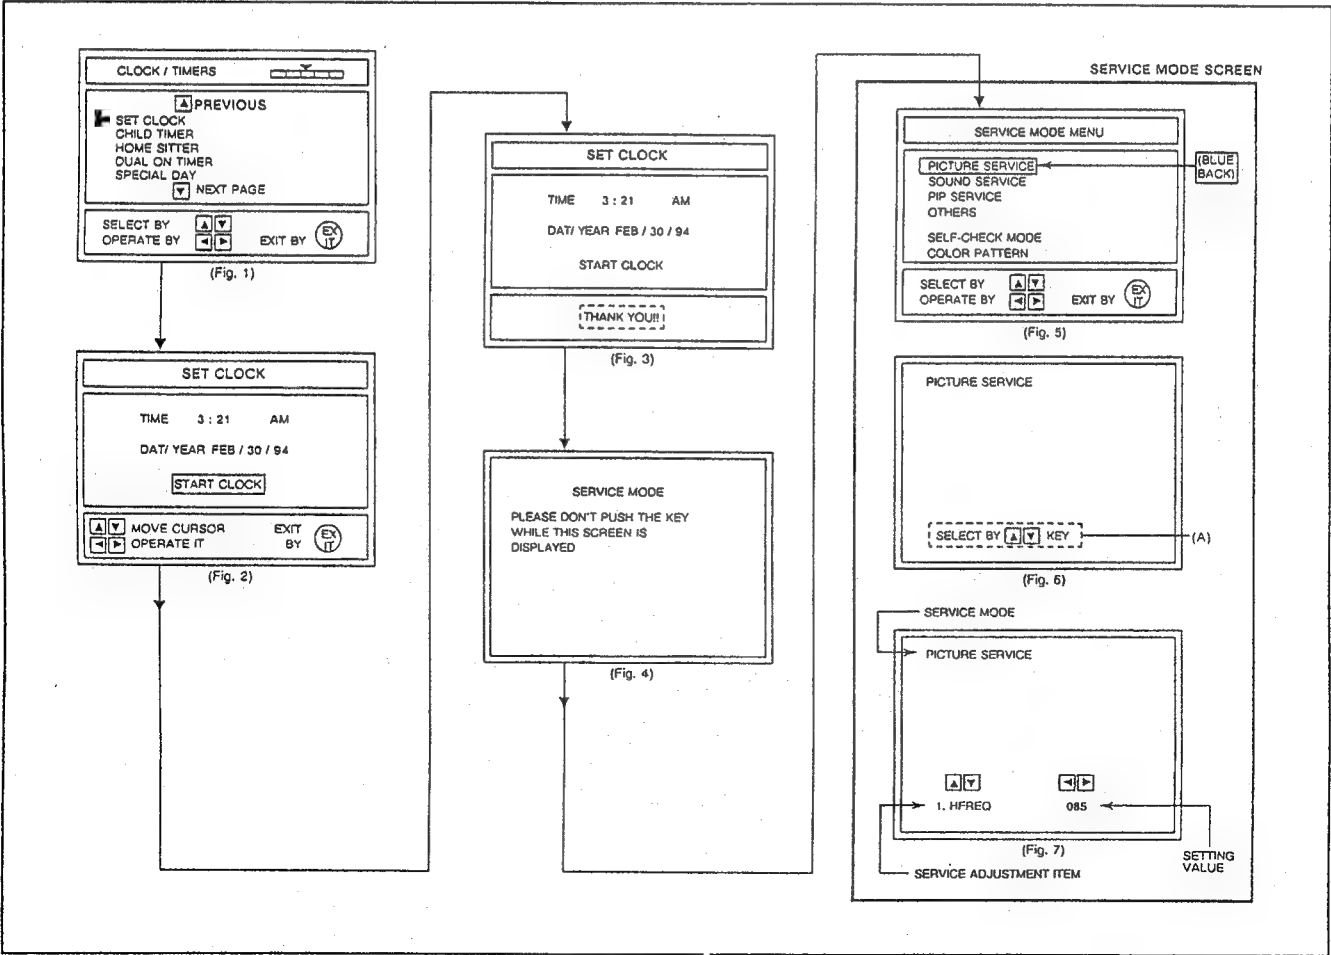

Fig. B

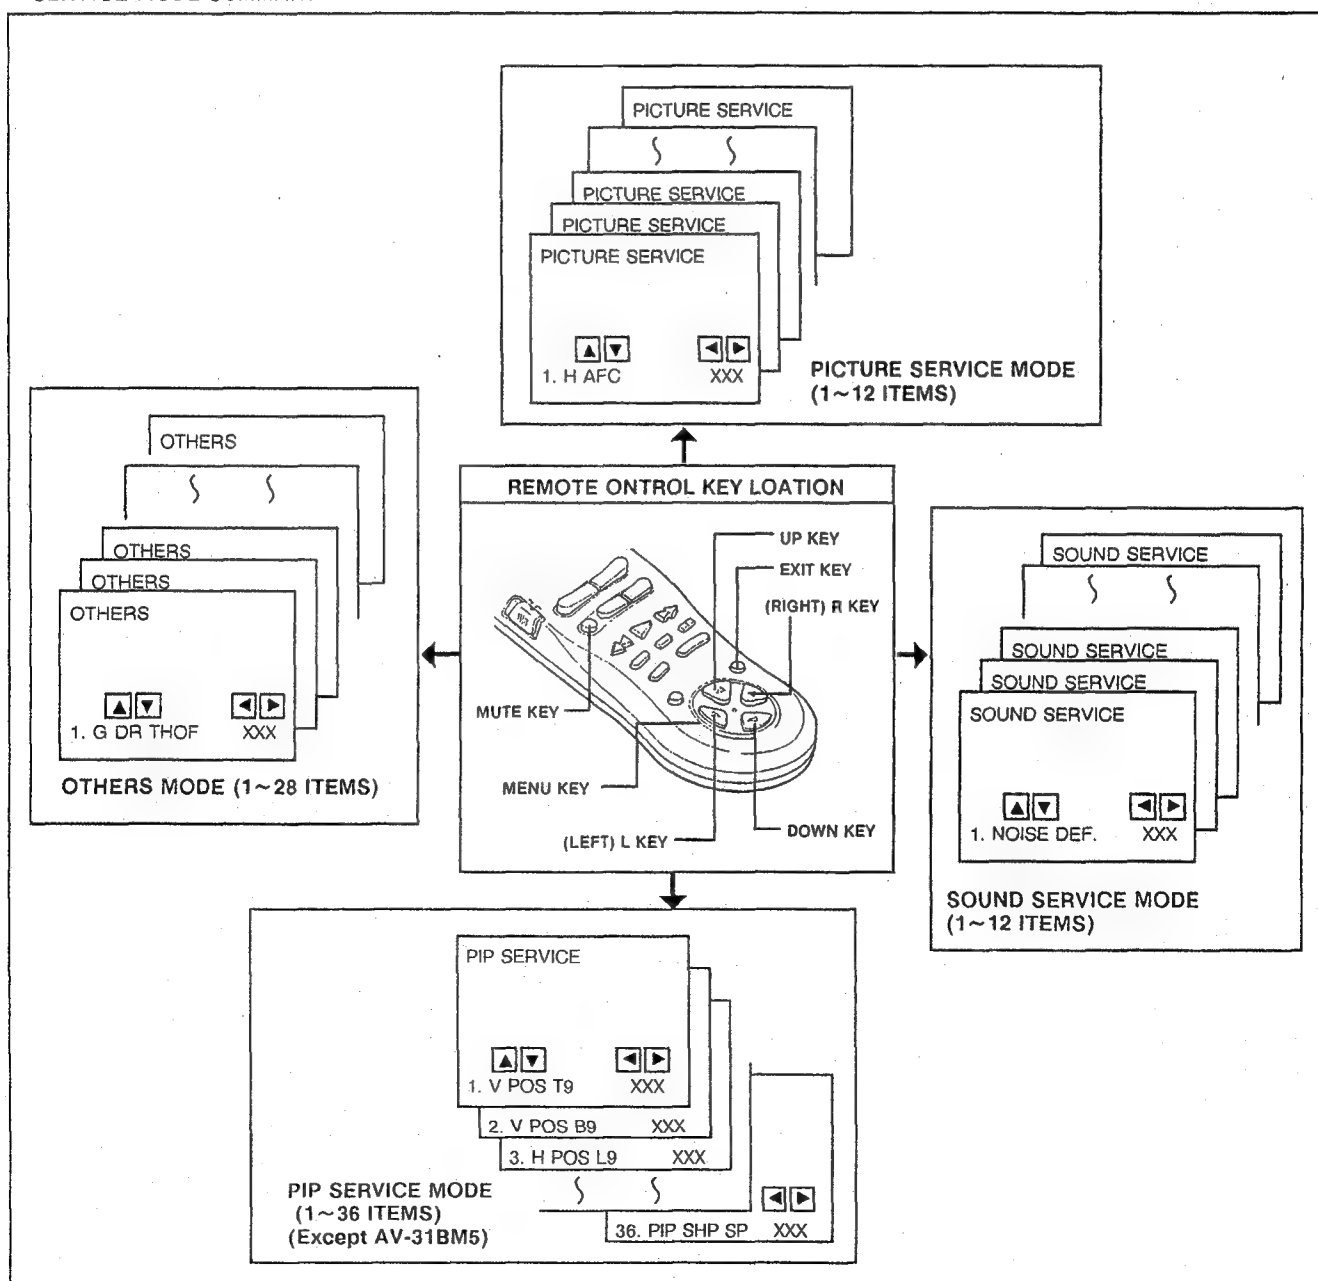

SERVICE ADJUSTMENT PROCEDURE AND RELEASE

1. Produce the service adjustment mode (Fig. 6).
2. Press the MENU UP / DOWN keys to select the SERVICE ITEM (Fig. 7).
3. Set the SETTING VALUE with the MENU L / R keys. (After adjusting, release the key to store the adjustment.)
4. After setting, press the EXIT key twice to release the SERVICE MODE MENU.

● REMOTE CONTROLLER KEY LOCATIONS

● SERVICE MODE SUMMARY

SERVICE MODE REFERENCE SETTING VALUE

- Ordinary adjustments are performed by entering the service mode and using the remote controller to fine adjust according to the reference setting values indicated in the table. Where these cannot be fine adjusted, perform the adjustments as described from Page 2-21.
- The reference setting values are approximations and should not be considered absolutely required values.

MODULATION VR so that the value (A) becomes $500V \pm 20Vp-p$. <div data-bbox="885 1099 1252 1310" data-label="Figure"> <p>The diagram shows a horizontal line with a vertical double-headed arrow labeled (A) indicating a peak-to-peak measurement of a signal waveform.</p> </div>
FOCUS adjustment	PATTERN GENERATOR		FOCUS VR [Within HVT]	<ul style="list-style-type: none"> • Perform after DBF. MODULATION adjustment. <ol style="list-style-type: none"> 1. Adjust the focus VR to obtain clear pictures. 2. Check that pictures have been adjusted to optimum appearance in both center and peripheral areas of the screen.

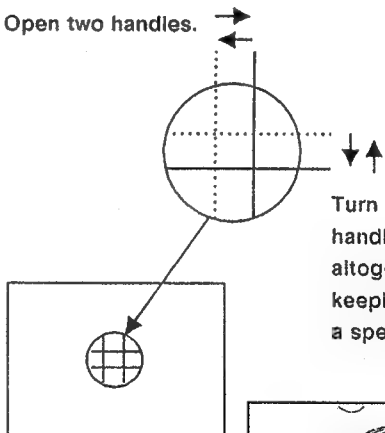

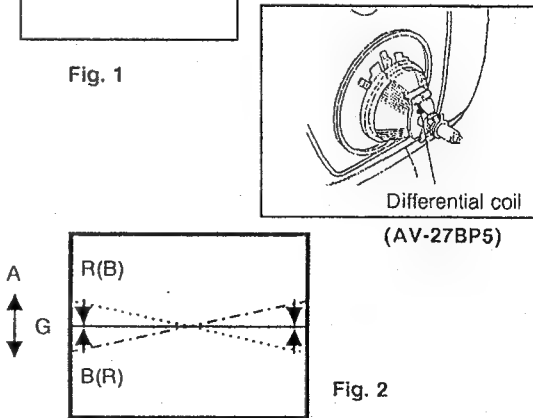

PURITY, CONVERGENCE

ADJUSTMENT OF PURITY

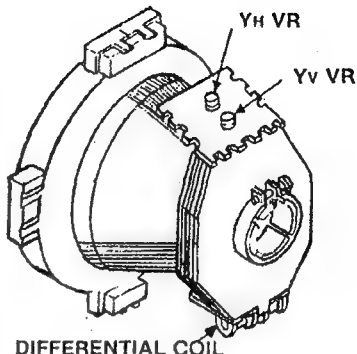

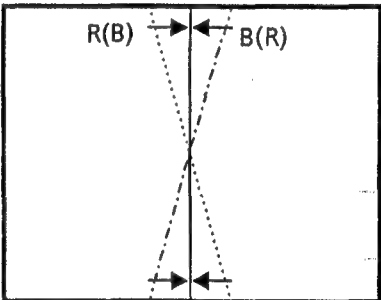

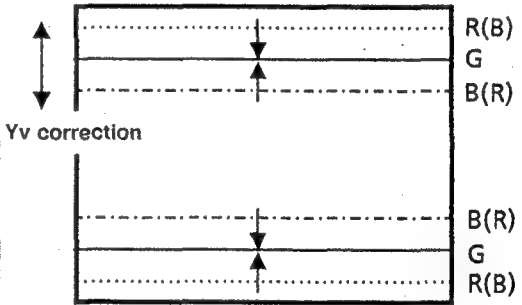

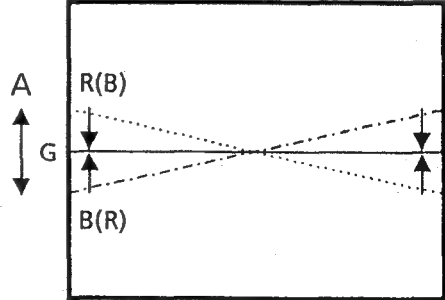

Adjustment Part	Description	Remarks
WEDGE PURITY MAGNET SCREEN VR DEF. YOKE	<p>Prior to starting adjustment, perform the following items:</p> <ol style="list-style-type: none"> 1. Remove a wedge inserted into the DEF. YOKE. At this time, clean the portion from which the wedge has been removed. 2. Peel adhesive used to fix six magnets with a tip of screw driver so that the magnets can be turned freely. 3. Let the monochrome screen appear. 4. Demagnetize the CRT with a demagnetizer. 5. Set the brightness and picture to slightly higher than the standard values, and warm up for about 20 ~ 30 minutes. <p>Adjustment method</p> <ol style="list-style-type: none"> 1. Input the GREEN picture with the pattern generator, adjust the screen with the SCREEN VR to make the GREEN picture visible. 2. After loosening the set screw of the DEF. YOKE, draw the yoke fully to the rear side to let irregular color of a vertical belt form appear on the screen. 3. Mutually pile up two PURITY MAGNETS, and set them to a horizontal position as initial magnets (Fig. 2). 4. While opening and closing or turning the claws of PURITY MAGNETS, let green vertical belts appear on the center of the screen (Fig. 3). 	<p>4 POLES CONVERGENCE MAGNETS</p> <p>PURITY MAGNET</p>  <p>6 POLES CONVERGENCE MAGNETS</p> <p>Fig. 1</p> <p>Align two purity magnets horizontally.</p>  <p>Fig. 2</p> <p>Green belt</p>  <p>Shift the green belt to the center</p> <p>Fig. 3</p>

Adjustment Part	Description	Remarks
	<div>6. Receive cross-hatch pattern.</div> <div>7. With the DEF. YOKE, make the line horizontal and let the line be further closer to the vertical center position (In this case, do not change the front and rear positions of the DEF. yoke).</div> <div>8. Change the initial picture appear on the screen.</div> <div>9. Make sure that the purity has been obtained regarding the red, blue and mono-color raster.</div> <div>10. Lightly tighten the set screws so that the DEF. YOKE is not moved back and forth.</div> <div>11. Insert the removed WEDGE into the initial position and fix it. (Fig. 5)</div> <div>12. Firmly tighten the set screws of the DEF. YOKE with an appropriate torque.</div>	<div><p>CROSS-HATCH PATTEN</p><p>CRT CENTRE MARK</p><p>Fig. 4</p></div> <div><p>Fig. 5</p></div>

CONVERGENCE

Adjustment Part	Description	Remarks
CONVERGENCE MAGNET	<div>Adjustment method</div> <div>1. Receive cross-hatch pattern.</div> <div>2. With the 4-POLE CONVERGENCE MAGNETS, overlap the red and blue lines at the center of the screen and turn the colour to Magenta (red/blue).</div> <div>3. Next, overlap magenta (red/blue) and green lines at the centre of the screen using the 6-POLE CONVERGENCE MAGNETS.</div> <div>4. By repeating the Steps 2 and 3 above, align the convergence of vertical line to that of the horizontal line at the centre of the screen.</div> <div>• Align the displacement of red and blue in the section A by adjustment with the DIFFERENTIAL COIL. (AV-27BP5)</div> <div>• After completing adjustment of the purity and convergence, fix the six magnets using adhesive.</div>	<div><p>Open two handles.</p><p>Turn the handles altogether while keeping them at a specific angle.</p><p>Fig. 1</p></div> <div><p>Differential coil (AV-27BP5)</p><p>Fig. 2</p></div>

ADJUSTMENT OF DYNAMIC CONVERGENCE FOR AV-35BP5

Adjustment Part	Description	Remarks
Y_H VR Y_v VR DIFFERENTIAL COIL	<ul style="list-style-type: none"> Adjust the dynamic convergence by means of the Y_H VR, Y_v VR and DIFFERENTIAL COIL. This adjustment should not be performed by oscillation of the DEF. yoke. <p>Adjustment method</p> <ol style="list-style-type: none"> Align the displacement of the red and blue vertical lines by adjustment with the Y_H VR (Figs. 7 and 8). Align the displacement of red and blue in Fig.9 by adjustment with the Y_v VR (Figs. 7 and 9). Align the displacement of red and blue in the section A by adjustment with the DIFFERENTIAL COIL (Figs. 7 and 10). 	 <p>Fig. 7</p> <p>YH correction</p>  <p>Fig. 8</p> <p>Yv correction</p>  <p>Fig. 9</p> <p>Section A</p>  <p>Fig. 10</p> <ul style="list-style-type: none"> After completing adjustment of the purity and convergence, fix the six magnets using adhesive.

PURITY · CONVERGENCE

Precautions for Adjustment

1. Should it be unavoidable to use a magnet to correct the purity, the magnet to be pasted should be separated by more than 80 mm from the DEF. yoke (If the magnet is made closer to the DEF. yoke, distortion will appear on the screen).
2. As shown in Fig. on the right side, attach the wedges for fixing the DEF. YOKE.
Moreover, apply silicon (KE4866) on the tips of the wedges. In this case, be sure not to apply it beside the tips.
3. In principle, any convergence correction piece should not be used. If unavoidable to do so, use it in a diagonal direction. Moreover, four or more correction pieces should not be used.

Back of CRT

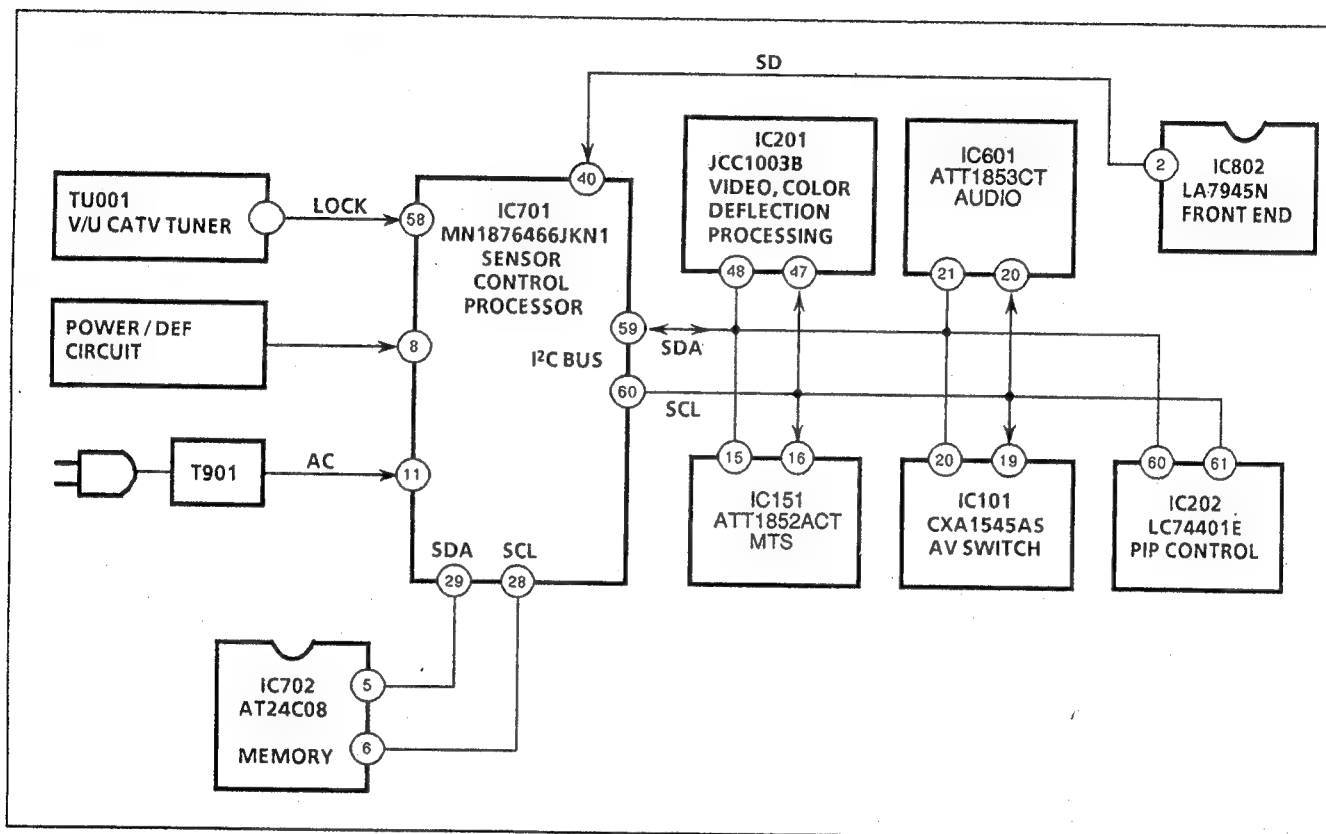

■ SELF CHECK FUNCTIONS

OUTLINE

This model includes a self check function that checks the circuit operating status and in event of malfunction, displays and stores the data in a memory. The data are stored in an I²C (IC702) memory.

Fault detection starts with the I²C bus and is performed according to the input states of the control lines connected to the main CPU.

System connection diagram

USAGE

Self check display mode entry

- 1) Set the SERVICE ADJUSTMENT MODE (see page 2-16).
- 2) At the service mode menu, select the SELF-CHECK MODE.
- 3) The screen indicates as shown in the table and the self check display mode is entered.

Self check display mode release

- 1) To save the fault history
Press the EXIT key of the remote controller or disconnect the power cord from the AC outlet.
- 2) To delete (reset) the fault history
Use the power key of the remote controller (or main power switch of the TV set mainframe,) to switch off the power.

Fault history

The fault history counts up to a maximum of 9 times for each item. If the number of times exceeds 9, the display remains at 9.

The fault history remains stored in the memory until deleted.

※ The sync signal (presence or absence) is not counted or stored.

< Self Check Function display mode >

BUS			
TUN	NG1	MEM	GOOD
POW/		VCD	NG1
DEF	GOOD	TONE	GOOD
SYNC	GOOD	MTS	NG3
TIM	GOOD	SW	GOOD
		PIP	GOOD

GOOD : NORMAL

※ Since sync is not counted, the fault times are not displayed.

Self check function operation

In addition to an actual fault, the following cases can be interpreted as faults to produce NG display and count.

- 1) Pulse or other type interference temporarily preventing signal transfer between circuits.
- 2) At power on / off, power supply (Vec) rise / fall timing deviation of ICs corresponding to the I²C bus can cause NG indications for multiple items, which can conversely interfere with check.

In cases where symptoms can be expected to recur, erasing (resetting) the fault history is recommended to ensure storing new check data.

CONTENTS

Self check is performed regarding the items indicated in the table.

Check item	Display name	Contents(check location)	Check signal(line)	Detection method
TUNER	TUN	Normal tuner operation [UV001 CEEM245-B02]	LOCK	Check for lock signal produced within a fixed time period(350ms) during channel selection.
POWER / DEF CIRCUIT	POW/DEF	Over current protector operation and over voltage protector operation.	B1 CURRENT & X-RAY DET VOLTAGE	Detection starts 5 seconds after main power ON and sub power ON. Error interpreted if faulty pulse input for more than 1 ms. The remote controller power switch remains inoperative until the power cord is disconnected, then reconnected to the AC outlet.
SYNC SIGNAL PRESENCE OR ABSENCE	SYNC	Presence or absence of video(sync) signal input [IC201, JCC1003B]	SD	Check for high potential from IC SD output pin after the self check display mode.
TIMER	TIM	Power supply frequency fluctuation(change)	AC	AC pulse counted periodically. Except for directly after CPU reset, Power supply frequency change from 50 to 60Hz, or from 60 to 50 Hz is checked during operation.

(I²C BUS)

Check item	Display name	Contents(check location)	Check signal(line)	Detection method
MEMORY	MEM	Normal memory read /write operation [IC702 AT24C08]	SDA	At power ON, a special pattern is written into a special address. This is read out and compared.
Video, color, deflection process	VCD	Normal IC operation [IC201 JCC1003B]	SDA	Check that data are sent from IC in response to CPU request
Audio control	TONE	Normal IC operation [IC601 ATT1853CT]	SDA	Check that data are sent from IC in response to CPU request
MTS demodulation	MTS	Normal IC operation [IC151 ATT1852ACT]	SDA	Check that data are sent from IC in response to CPU request
Input switching	SW	Normal IC operation [IC101 CXA1545AS]	SDA	Check that data are sent from IC in response to CPU request
PIP control	PIP	Normal IC operation [IC202 LC74401E]	SDA	Check that data are sent from IC in response to CPU request

STANDARD CIRCUIT DIAGRAM

NOTE ON USING CIRCUIT DIAGRAMS

1.SAFETY

The components identified by the  symbol and shading are critical for safety. For continued safety replace safety critical components only with manufactures recommended parts.

2.SPECIFIED VOLTAGE AND WAVEFORM VALUES

The voltage and waveform values have been measured under the following conditions.

- (1)Input signal :Color bar signal
 - (2)Setting positions
of each knob/button
and variable resistor :Original setting position
when shipped
 - (3)Internal resistance of tester :DC 20k Ω /V
 - (4)Oscilloscope sweeping time :H \Rightarrow 20 μ S/div
:V \Rightarrow 5mS/div
:Others \Rightarrow Sweeping time is
specified
 - (5)Voltage values :All DC voltage values
- * Since the voltage values of signal circuit vary to some extent according to adjustments, use them as reference values.

3.INDICATION OF PARTS SYMBOL[EXAMPLE]

- In the PW board :R1209 \rightarrow R209

4.INDICATIONS ON THE CIRCUIT DIAGRAM

(1)Resistors

- Resistance value

No unit :[Ω]
K :[K Ω]
M :[M Ω]

- Rated allowable power

No indication :1/6[W]
Others :As specified

- Type

No indication :Carbon resistor
OMR :Oxide metal film resistor
MFR :Metal film resistor
MPR :Metal plate resistor
UNFR :Uninflamable resistor
FR :Fusible resistor

- * Composition resistor 1/2 [W] is specified as 1/2S or Comp.

(2)Capacitors

- Capacitance value

1or higher :[pF]
less than 1 :[μ F]

- Withstand voltage

No indication :DC50[V]
Others :DC withstand voltage[V]
AC indicated :AC withstand voltage[V]

- * Electrolytic Capacitors

47/50[Example]:Capacitance value[μ F]/withstand voltage[V]

•Type

No indication :Ceramic capacitor
MY :Mylar capacitor
MM :Metalized mylar capacitor
PP :Polypropylene capacitor
MPP :Metalized polypropylene capacitor
MF :Metalized film capacitor
TF :Thin film capacitor
BP :Bipolar electrolytic capacitor
TAN :Tantalum capacitor

(3)Coils

No unit :[μ H]
Others :As specified

(4)Power Supply

 :B1(135.5V \pm 1V)
 :B2(12V)
 :9V
 :5V

* Respective voltage values are indicated.

(5)Test Point

 : Test point
 : Only test point display

(6)Connecting method

 : Connector
 : Wrapping or soldering
 : Receptacle

(7)Ground symbol

 : LIVE side ground
 : ISOLATED(NEUTRAL) side ground
 : EARTH ground
 : DIGITAL ground

5.NOTE FOR REPAIRING SERVICE

This model's power circuit is partly different in the GND. The difference of the GND is shown by the LIVE (primary : ) side GND and the ISOLATED (NEUTRAL : ) side GND. Therefore, care must be taken for the following points.

- (1) Do not touch the LIVE side GND or the LIVE side GND and the ISOLATED (NEUTRAL) side GND simultaneously. If the above caution is not respected, an electric shock may be caused. Therefore, make sure that the power cord is surely removed from the receptacle when, for example, the chassis is pulled out.
- (2) Do not short between the LIVE side GND and ISOLATED (NEUTRAL) side GND or never measure with a measuring apparatus (oscilloscope, etc.) the LIVE side GND and ISOLATED (NEUTRAL) side GND at the same time. If the above precaution is not respected, a fuse or any parts will be broken.

◇ Since the circuit diagram is a standard one, the circuit and circuit constants may be subject to change for improvement without any notice.

PARTS LIST

CAUTION

- The parts identified by the Δ symbol are important for the safety . Whenever replacing these parts, be sure to use specified ones to secure the safety .
 - The parts not indicated in this Parts List and those which are filled with lines — in the Parts No. columns will not be supplied .
 - P. W. Board Ass'y will not be supplied, but those which are filled with the Parts No. in the Parts No. columns will be supplied .
 - As a rule, the resistors and capacitors which are indicated as shown in "HOW TO EXPRESS PARTS NUMBERS OF STANDARD PARTS" are not shown in the list of the parts on the board .
- When ordering the service parts, confirm the resistance/rated power, capacitance/rated voltage, and type of the parts, then order by the part No. indicated according to "HOW TO EXPRESS PARTS NUMBERS OF STANDARD PARTS" .

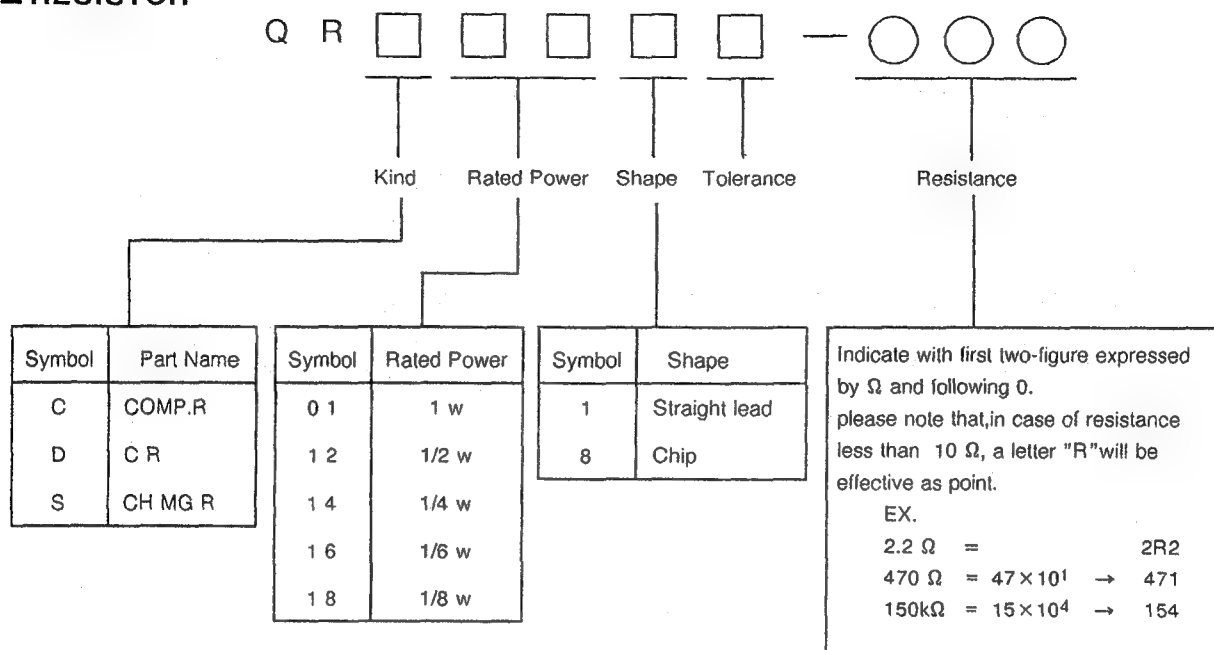

ABBREVIATIONS OF RESISTORS, CAPACITORS AND TOLERANCES

RESISTORS		CAPACITORS	
C R	Carbon Resistor	C CAP.	Ceramic Capacitor
F R	Fusible Resistor	E CAP.	Electrolytic Capacitor
P R	Plate Resistor	M CAP.	Mylar Capacitor
V R	Variable Resistor	HV CAP.	High Voltage Capacitor
HV R	High Voltage Resistor	MF CAP.	Metalized Film Capacitor
MF R	Metal Film Resistor	MM CAP.	Metalized Mylar Capacitor
MG R	Metal Glazed Resistor	MP CAP.	Metalized Polystyrol Capacitor
MP R	Metal Plate Resistor	PP CAP.	Polypropylene Capacitor
OM R	Metal Oxide Film Resistor	PS CAP.	Polystyrol Capacitor
CMF R	Coating Metal Film Resistor	TF CAP.	Thin Film Capacitor
UNF R	Non-Flammable Resistor	MPP CAP.	Metalized Polypropylene Capacitor
CH V R	Chip Variable Resistor	TAN. CAP.	Tantalum Capacitor
CH MG R	Chip Metal Glazed Resistor	CH C CAP.	Chip Ceramic Capacitor
COMP. R	Composition Resistor	BP E CAP.	Bi-Polar Electrolytic Capacitor
LPTC R	Linear Positive Temperature Coefficient Resistor	CH AL E CAP.	Chip Aluminum Electrolytic Capacitor
		CH AL BP CAP.	Chip Aluminum Bi-Polar Capacitor
		CH TAN. E CAP.	Chip Tantalum Electrolytic Capacitor
		CH AL BP E CAP.	Chip Tantalum Bi-Polar Electrolytic Capacitor

POWER DEF PW BOARD ASS'Y [SGM-2501A-H2 (AV-27BP5(CA))]

Regarding the parts list for the power def PW board Ass'y [SGM-2501A-H2] of the model for canada, only the different parts from those of the model [SGM-2001A-H2] are described. For further details regarding the other parts, refer to the parts list of the model [SGM-2001A-H2] described on page 4-16 through page 4-18.

POWER / DEF PW BOARD ASS'Y
[SGM-2504A-H2 (AV-31BP5) / SGM-2503A-H2 (AV-31BM5), (CA)]

Regarding the parts list for the power def PW board Ass'y [SGM-2504A-H2 / SGM-2503A-H2] of the model for Canada, only the different parts from those of the model [SGM-2004A-H2 / SGM-2003A-H2] are described. For further details regarding the other parts, refer to the parts list of the model [SGM-2004A-H2 / SGM-2003A-H2] described on page 4-27 through page 4-29.

POWER DEF PW BOARD ASS'Y [SGM-2506A-H2 (AV-35BP5(CA))]

Regarding the parts list for the power def PW board Ass'y [SGM-2506A-H2] of the model for Canada, only the different parts from those of the model [SGM-2006A-H2] are described. For further details regarding the other parts, refer to the parts list of the model [SGM-2006A-H2] described on page 4-38 through page 4-40.

5. SERVICE ADJUSTMENT PROCEDURE AND RELEASE (Page 2-17)

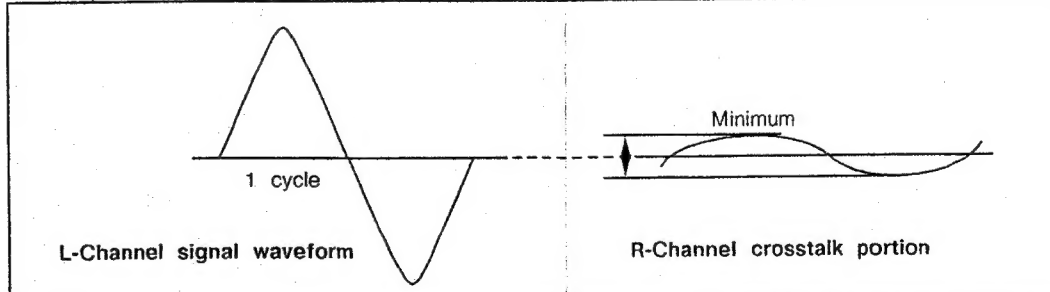

PICTURE SERVICE MODE ADJUSTMENT (Page 2-22)

Item	Measuring instrument	Test point	Adjustment part	Description
V. HEIGHT V. LIN. V. POSI. adjustment	PATTERN GENERATOR		4. V. SHIFT 5. V. SIZE 6. V. LIN V. CENTER SW (S1401) [POWER/DEF.PWB] 12. V.S CORRE	<ol style="list-style-type: none"> Supply a crosshatch signal input. With the remote controller, confirm the 4. V. SHIFT value is 15 (this value is fixed at 15 and must not be moved). With the remote controller, adjust 6. V. LIN so that the picture is symmetrical top to bottom. Align the vertical center with the V. CENTER switch of the Main PWB. With the remote controller, adjust 5. V. SIZE to set the vertical amplitude so that 92% of the overall crosshatch is displayed on the screen. As required, repeat above steps 2~5.
				
				and 12. V.S CORRE
WHITE BALANCE (Low Light) adjustment	PATTERN GENERATOR		15. DYNAMIC WH 16. G CUT OFF 17. B CUT OFF	<ol style="list-style-type: none"> With the remote controller, set 15. DYNAMIC WH is 0. With the remote controller, Supply a greyscale signal (luminance only stairstep waveform) input. With the remote controller, adjust 16. G CUTOFF and 17. B CUTOFF to set the white balance to where the greyscale signal to nearly black (dark direction). Return 15. DYNAMIC WH to 1.

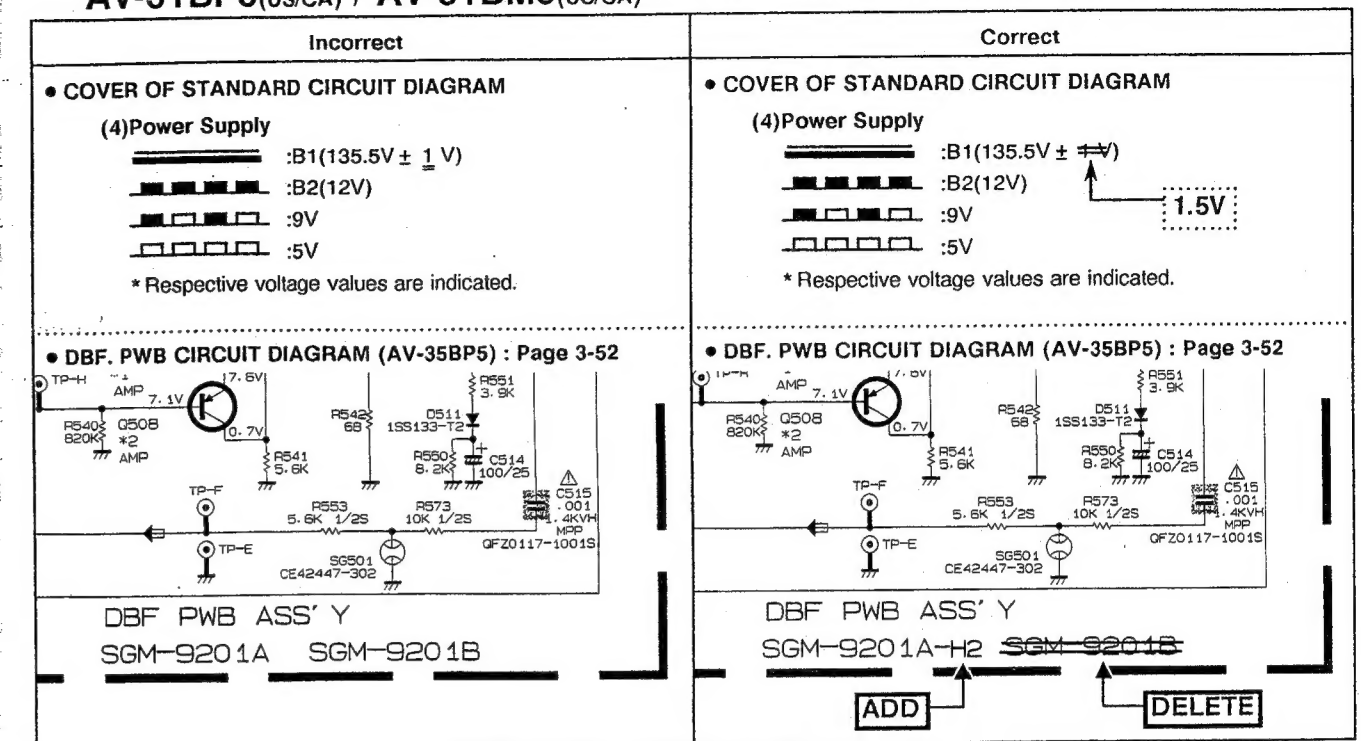

PIP SERVICE MODE ADJUSTMENT (Except AV-31BM5) (Page 2-26)

Item	Measuring instrument	Test point	Adjustment part	Description
PIP CONTRAST adjustment			30. PIP1 CONT. 33. PIP2 CONT.	<ol style="list-style-type: none"> Receive a broadcast. Display the PIP picture. Adjust 30. PIP1 CONT for the same optimum picture as the main picture. Use the remote controller SWAP key to interchange the main and PIP pictures. Adjust 33. PIP2 CONT for optimum picture.
PIP TINT & COLOR adjustment			28. PIP1 TINT 29. PIP1 COLOR 31. PIP2 TINT 32. PIP2 COLOR	<ol style="list-style-type: none"> Receive a broadcast. Display the PIP picture. Adjust 28. PIP1 TINT and 29. PIP COLOR for the same optimum picture as the main picture. Use the remote controller SWAP key to interchange the main and PIP pictures. Adjust 31. PIP2 TINT and 32. PIP2 COLOR for optimum picture.

SOUND SERVICE MODE ADJUSTMENT (Page 2-24)

Item	Measuring instrument	Test point	Adjustment part	Description
MTS INPUT LEVEL adjustment			2. INPUT LVL DELETE	1. Confirm 2. INPUT LVL is at the reference value.
MTS ST VCO adjustment			3. FM MONITOR 4. STEREO VCO DELETE	<ol style="list-style-type: none"> Confirm 4. STEREO VCO is at the standard adjustment value. Correctly receive a stereo broadcast and confirm absence of abnormal sound or other problems. If not normal, line adjust the reference value.
MTS FILTER adjustment			5. PILOT CANG 6. B&X FILTER	<ol style="list-style-type: none"> Confirm 5. PILOT CANG and 6. FILTER is at the standard reference value. Correctly receive a stereo broadcast and confirm absence of abnormal sound or other problems. If not normal, line adjust the reference value.
MTS SEPA. adjustment	OSCILLOSCOPE		7. LOW F SEPA 8. HIGH F SEPA	<ol style="list-style-type: none"> Set the TV multichannel sound signal generator for generating stereo signal and output signal of about 300Hz from the left channel. Connect an oscilloscope to the "L" output and obtain a clear view of 1- cycle portion of 300Hz waveforms. Change connection of the oscilloscope to the "R" output and expand the voltage axis. Adjust the 7. LOW F SEPA and minimize the crosstalk portion. Next set the signal for 3 kHz and in the same manner, adjust 8. HIGH F SEPA.
				
MTS SAP VCO adjustment			9. SELF MONITOR 10. SAP VCO	<ol style="list-style-type: none"> Confirm 10. SAP VCO is at the reference value. Confirm an SAP broadcast can be received normally. If not normal, line adjust the reference value.
